Introduction

CRA Standardization request

EUROPEAN
COMMISSION

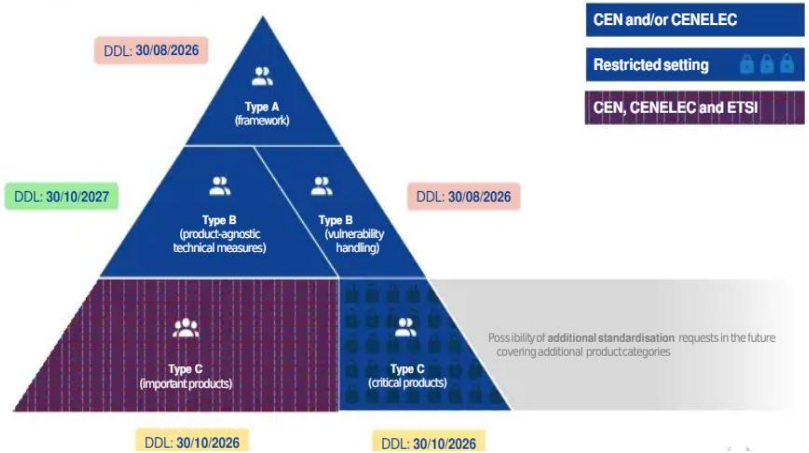
Brussels, 3.2.2025
C(2025) 618 final

COMMISSION IMPLEMENTING DECISION

of 3.2.2025

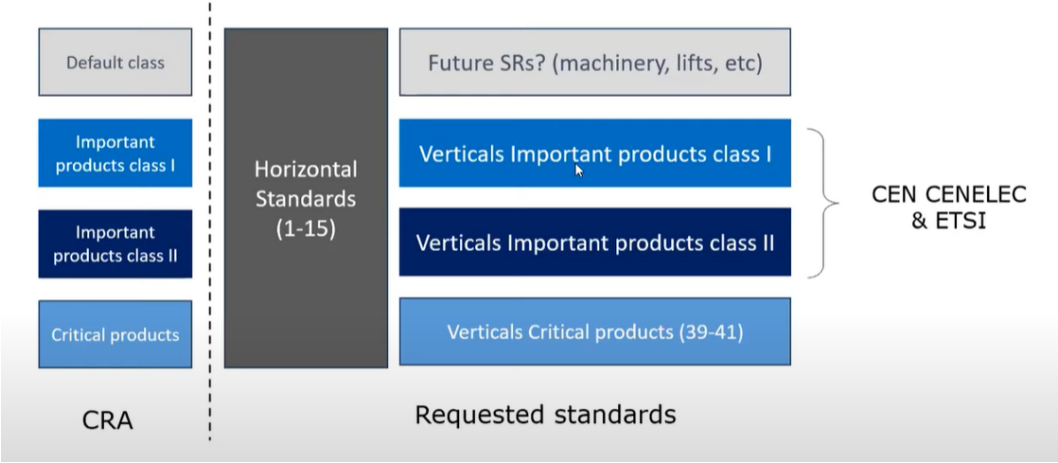
on a standardisation request to the European Committee for Standardisation (CEN), the European Committee for Electrotechnical Standardisation (Cenelec) and the European Telecommunications Standards Institute (ETSI) as regards products with digital elements in support of Regulation (EU) 2024/2847 of the European Parliament and of the Council of 23 October 2024 on horizontal cybersecurity requirements for products with digital elements and amending Regulations (EU) No 168/2013 and (EU) 2019/1020 and Directive (EU) 2020/1828 (Cyber Resilience Act)

https://ec.europa.eu/transparency/documents-register/detail?ref=C(2025)618&lang=en
https://cyberstand.eu/sites/default/files/2025-02/Filipe%20Slides%20CRA_implementation_Feb-2025.pdf



Horizontal standards (1-15)	Vertical standards (16-41)
• Risk-based approach (CRA Annex I) • Essential Requirements (CRA Annex I part 1) • Vulnerability Handling (CRA Annex I part 2)	• Important products class 1 (CRA Annex III) • Important products class 2 (CRA Annex III) • Critical products (CRA Annex IV)

CRA Standardization request



41 topics

3 ‘types’ of deliverables:

Category “A”: horizontal framework	Category “B”: product-agnostic technical measures & vulnerability handling	Category “C”: Important and critical products CRA Standardization Request 9 April 2025 36
• Only CEN and CENELEC • Topic #1 (JTC 13 WG9) • deadline 2026-08-30	• Only CEN and CENELEC • Topic #2-15 (JTC 13 WG9) • Deadline 2027-10-30 (except for line 15 - vulnerability handling - 2026-08-30)	• Topic #16-38: CEN, CENELEC and ETSI • deadline 2026-10-30 • Topic #39-41:CEN and CENELEC • Critical products

A section of the CEN, CENELEC and ETSI WP

Version: V1
Date: 2025-04-02

CEN, CENELEC and ETSI Work Programme
M/604- Cyber Resilience Act

M/606	Technical Committee(s)		M/606 - Planning for standard development						
Topics M606 - Annex I	TC ref.	TC title	In collaboration with	Work Item	Standard reference	Standard title	Last realized stage	Deadline for adoption	Comment
Line 1: European standard(s) on designing, developing and producing products with digital elements in such a way that they ensure an appropriate level of cybersecurity based on the risks									
1	CEN-CLC/JTC 13 WG 9	Cybersecurity and Data Protection	N/A	JT013089	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Cybersecurity requirements for products with digital elements Principles for cyber resilience	10.99 - NWI - New Work Item adopted	2026/08/30	
Lines 2-14 - European standard(s) CRA essential requirements									
2 to 14	CEN-CLC/JTC 13 WG 9	Cybersecurity and Data Protection	N/A	JT013091	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Cybersecurity requirements for products with digital elements – Generic Security Requirements	10.99 - NWI - New Work Item adopted	2027/10/30	
Line 15: European standard(s) on vulnerability handling for products with digital elements									
15	CEN-CLC/JTC 13 WG 9	Cybersecurity and Data Protection	N/A	JT013090	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Cybersecurity requirements for products with digital elements – Vulnerability handling	10.99 - NWI - New Work Item adopted	2026/08/30	
Line 16: European standard(s) on essential cybersecurity requirements for identity management systems and privileged access management software and hardware, including authentication and access control readers, including biometric readers									
16	CEN/TC 224 WG 17	Personal identification and related personal devices with secure element, systems, operations and privacy in a multi sectorial environment	CEN/TC 224 WG 17 (including expertise from WG 18,19 and 20) TC ESI	002242XX	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Identity management systems and privileged access management software and hardware, including authentication and access control readers, including biometric readers : criteria to fulfill with the essential requirements from regulation 2024/2487 (CRA)	TC decision taken	2026/10/30	
Line 17: European standard(s) on essential cybersecurity requirements for standalone and embedded browsers									
17a	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 617-1*	European standard(s) on essential cybersecurity requirements for embedded browsers	PWI - Proposed Work Item created	2026/10/30	
17b	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 617-2*	European standard(s) on essential cybersecurity requirements for standalone browsers	PWI - Proposed Work Item created	2026/10/30	
Line 18: European standard(s) on essential cybersecurity requirements for password managers									
18	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 618*	European standard(s) on essential cybersecurity requirements for password managers	PWI - Proposed Work Item created	2026/10/30	
Line 19: European standard(s) on essential cybersecurity requirements for software that searches for, removes, or quarantines malicious software									
19	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 619*	European standard(s) on essential cybersecurity requirements for software that searches for, removes, or quarantines malicious software	PWI - Proposed Work Item created	2026/10/30	
Line 20: European standard(s) on essential cybersecurity requirements for products with digital elements with the function of virtual private network (VPN)									
20a	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9 CLC/TC 65X WG3 mode 2	*(Will be be defined after the adoption of the Work Item)*	*EN 304 620*	European standard(s) on essential cybersecurity requirements for products with digital elements with the function of virtual private network (VPN)	PWI - Proposed Work Item created	2026/10/30	
20b	CLC/TC 65X WG 3	Industrial-process measurement, control and automation	ETSI TC Cyber EUSR Mode 2	81652	*EN 62443-5-XX (Will be be defined after the activation of the Work Item)*	Security Profile for products with digital elements with the function of virtual private network (VPN)	00.60 - PWI - Preliminary Work Item created	2026/10/30	
Line 21: European standard(s) on essential cybersecurity requirements for network management systems									
21a	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9 CLC/TC 65X WG3 mode 2	*(Will be be defined after the adoption of the Work Item)*	*EN 304 621*	European standard(s) on essential cybersecurity requirements for network management systems	PWI - Proposed Work Item created	2026/10/30	
21b	CLC/TC 65X WG 3	Industrial-process measurement, control and automation	ETSI TC Cyber EUSR Mode 2	81650	*EN 62443-5-XX (Will be be defined after the activation of the Work Item)*	Security Profile for network management systems (based on IEC 62443)	00.60 - PWI - Preliminary Work Item created	2026/10/30

Standards developed under CEN/CENELEC

CEN/CENELEC Work Programme

Project Team 1	Project team 2	Project team 3

• **Cybersecurity requirements for products with digital elements – Principles for cyber resilience**
• WI number – JT013089
• CRA requirement Annex I, Part I, 1
• M/606 item 1, 30/08/2026
• Does not (directly) provide a presumption of conformity.
• Addressing the process activities for security risk management during the total product live cycle.
• Activities are described as:
  • Expected inputs
  • Requirement
  • Expected outputs
  • Assessment criteria
• As a horizontal framework standard, it will not mandate any specific methodologies.
	• **Cybersecurity requirements for products with digital elements – Generic security requirements**
	• WI number : JT013091
	• CRA requirement Annex I, Part I, 2
	• M/606 items 2-14, 30/10/2027
	• Does not provide a presumption of conformity.
	• Addressing the essential product requirements.
	• Provides a library of security controls with their objectives and more technical assessment criteria.
	• Provides a mapping of the essential requirements to these security controls.
	• Builds upon the EN 18031:2024 series, augmented with additional security controls.
		• **Cybersecurity requirements for products with digital elements – Vulnerability handling**
		• WI number : JT013090
		• CRA requirement Annex I, Part II
		• M/606 item 15, 30/08/2026
		• The only horizontal standard of the three that hopefully might be suited for citation to provide a partial presumption of conformity.
		• Addressing the process activities for vulnerability handling.
		• Perceived as a horizontal standard that the verticals should be able to normatively reference with no or minimal adoptions.
		• Strong normative dependency on the SOTA standards EN ISO/IEC 30111 and 29147.

CEN/CENELEC JTC 13 WG9 Work Programme

Project 1

High level process **activities** to address the Total Product Life Cycle, defining:

- Goal that needs to be achieved
- Mandatory and optional inputs
- Minimum expected outcomes

Process activities such as security monitoring, risk assessment, verification, validation and release

Project 3

More detailed process **activities** (with assessment criteria fit for a presumption of conformity) to address the vulnerability management requirements

During risk assessment the appropriate security controls and their appropriate level can be selected to ensure risks are mitigated to an acceptable level

Risk assessment

Product requirements

Project 2

A mapping of the essential product requirements to a list of appropriate **security controls** at various levels

(controls have their own scale/levels to achieve the goal of the security control)

During the elicit requirements activity the deliverables from project 2 can be used to determine and select the appropriate security controls that should be implemented into the product to fulfil on a risk-based manor the essential requirements

Dual use of CEN/CENELEC Standards

Directly use by standard users

- Clarifying the common expectations of what is required for the CRA
- Manufacturers of the default class products (>90%) can understand the requirements and the security capabilities that their products should fulfill
- Alignment with all stakeholders including market surveillance authorities to shape the compliance process
- Built to support manufacturers and notified bodies for undergoing the 3rd-party conformity assessment.

Basis for vertical standards

- Basis for the vertical (ETSI) standards
- The “General principles for cyber resilience” creates a framework for the expectations required for verticals
- The “Generic security requirements” used directly or referenced in the verticals to be used as the basis for the product specific controls
- The “Vulnerability handling” can be applied directly or a vertical standard may enforce this

State of the art (according to CEN/CENELEC)

- EN ISO/IEC 29147:2018 ➔ Information technology — Security techniques — Vulnerability disclosure
- EN ISO/IEC 30111:2019 ➔ Information technology — Security techniques — Vulnerability handling processes
- EN IEC 62443-4-1 (defect management)
- ISO/IEC TR 6114:2023 ➔ Cybersecurity — Security considerations throughout the product life cycle
- NTIA / CISA documents on SBOM
  E.g.; Minimum elements (incl. the most recent version: https://www.cisa.gov/sites/default/files/2025-08/2025_CISA_SBOM_Minimum_Elements.pdf)
- First - Product Security Incident Response Team (PSIRT)
  https://www.first.org/standards/frameworks/psirts/psirt_maturity_document
- BSI TR 03183 series
  Technical Guideline on Cyber Resilience Requirements for Manufacturers and Products
  - Part 1: General requirements
  - Part 2: Software Bill of Materials (SBOM)
  - Part 3: Vulnerability Reports and Notification
- Struggles with global standards
  - Reference clauses of ISO/IEC 30111 and ISO/IEC 29147
  - Requirement from the actual draft
    - Vulnerability reports **shall** be verified in accordance with EN ISO/IEC 30111:2020 Clause 7.1.4a
      ➔ Mismatch with ISO/IEC 30111 7.1.4: Vendors **should** verify reported vulnerabilities

Proposal: Reported vulnerabilities shall be verified

Other general details

- Other WGs involved: CEN/TC 224 WG 17, CLC/TC 47X WG 3, CEN-CLC/JTC 13 WG 6, CLC/TC 47X WG 2, **CLC/TC 65X WG 3**, CLC/TC 47X/WG CRA, CLC/TC 47X WG 1
- Seek support of ENISA to align between the standards and EUCC
- Deliverable PT3:
  - Under risk
  - It tries to provide presumption of conformity
  - All the vertical works are related to that one -> risk to delay those as well
  - PT2 on hold
    - Re-use the experts
- Add HBOM also on their radar:
  - CRA Annex I, Part II.(1) identify and document vulnerabilities and **components** contained in products with digital elements, including by drawing up a software bill of materials in a commonly….
  - CRA 3.(6) '**component**' means **software** or **hardware** intended for integration into an electronic information system;
  - CRA 3.(4) '**software**' means the part of an electronic information system which consists of computer code;
  - CRA 3.(5) '**hardware**' means a physical electronic information system, or parts thereof capable of processing, storing or transmitting digital data;

Publication	11 November 2026

- Title: Essential cybersecurity requirements for **Network Management Systems**
- CRA Network Management Topic # 21
- Draft version 0.0.3

ETSI Work Programme
DEN/CYBER-EUS-010

Timeline	
Work item adoption	22 August 2025
Early draft	15 September 2025
Final draft	31 January 2026
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **Security information and event management (SIEM)** systems
- CRA SIEM systems Topic # 22 Part 1/2
- Draft version 0.0.0
- Approved at the end of August

ETSI Work Programme
DEN/CYBER-EUS-011

Timeline	
Work item adoption	1 May 2025
Early draft	9 July 2025
Final draft	30 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **smart home general purpose virtual assistants**
- CRA Smart home assistants Topic # 31 full
- Draft version 0.0.1

ETSI Work Programme
DEN/CYBER-EUS-012

Timeline	
Work item adoption	1 May 2025
Early draft	10 August 2025
Final draft	30 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **operating systems**
- CRA operating systems Topic # 26 Part 1/N
- Draft version 0.0.3
- Updates
  - The meetings are oriented towards the existing contributions done in Forge
  - Handling: PC OS, mobile phone OS, server OS, RTOS, embedded OS, etc.
    - Elements included: kernel, device drivers, libraries, authentication services, logging and monitoring, configuration of security-related things, etc.
    - Not included: hypervisors, containers, boot loaders, hardware, etc.
  - Chapters
    - Products overview and architecture (incl. OS security functions, HL OS architectures, access and control mechanisms, scheduling and resource mgmt.)
    - Use-cases to assist manufacturers in choosing the security levels and risk factors
    - Risk factors and tolerance
    - Requirements specifications
    - Security profiles

- Title: Essential cybersecurity requirements for **routers, modems intended for the connection to the internet, and switches**
- CRA routers, modems, and switches Topic # 27 Part 1/2
- **Stable** Draft version 0.0.5
- Updates
  - Already a 59-pages document
  - Description of the products and the context
  - A capability model based on the products' way of working
  - Cybersecurity requirements (secure by design – referencing PT1 from CEN/CENELEC, no known vulnerabilities, secure by default configuration, security updates, etc.)
  - Vulnerability handling (based on CEN/CENELEC PT3)

ETSI Work Programme
DEN/CYBER-EUS-014

Timeline	
Work item adoption	1 May 2025
Early draft	9 July 2025
Final draft	31 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **smart home products with security functionalities**; including smart door locks, security cameras, baby monitoring systems and alarm systems
- CRA Smart home security products Topic # 32 full
- Draft version 0.0.1

ETSI Work Programme
DEN/CYBER-EUS-015

Timeline	
Work item adoption	7 July 2025
Early draft	12 July 2025
Final draft	30 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **Public key infrastructure** and **digital certificate issuance** software
- CRA PKI and digital certificate issuance software - Topic #24
- Draft version 0.0.1

ETSI Work Programme
DEN/CYBER-EUS-016

Timeline	
Work item adoption	26 May 2025
Early draft	18 June 2025
Final draft	31 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **hypervisors and container runtime systems** that support virtualised execution of operating systems and similar environments
- Essential cybersec reqts for hypervisors and container runtime systems Topic #35
- Draft version 0.0.3
- Updates:
  - hardware" was replaced with "infrastructure" and an explicit note was added that this layer may contain one or more servers
  - They work on new sets of threats for each component
  - Security requirements updates: isolation requirements, integrity requirements
  - Agreed to not consider political considerations as influencing points for security requirements
  - Agreed to be technology-agnostically developed and not binding technologies, components, providers
  - Working on the conformance assessment structure: test-case approach, simplified PT2 methodology and IoT-style approach relying on ETSI EN 303645

ETSI Work Programme
DEN/CYBER-EUS-017

Timeline	
Work item adoption	30 June 2025
Early draft	12 August 2025
Final draft	31 December 2025

DEN/CYBER-EUS-019

Timeline	
Work item adoption	20 August 2025
Early draft	30 September 2025
Final draft	1 May 2026
Publication	10 February 2027

- Title: Cybersecurity Requirements for **Network Functions of Telecommunications Systems**
- Draft version 0.0.0
- Work item was just adopted

ETSI Work Programme
DEN/CYBER-EUS-020

Timeline	
Work item adoption	22 August 2025
Early draft	24 August 2025
Final draft	22 May 2026
Publication	17 March 2027

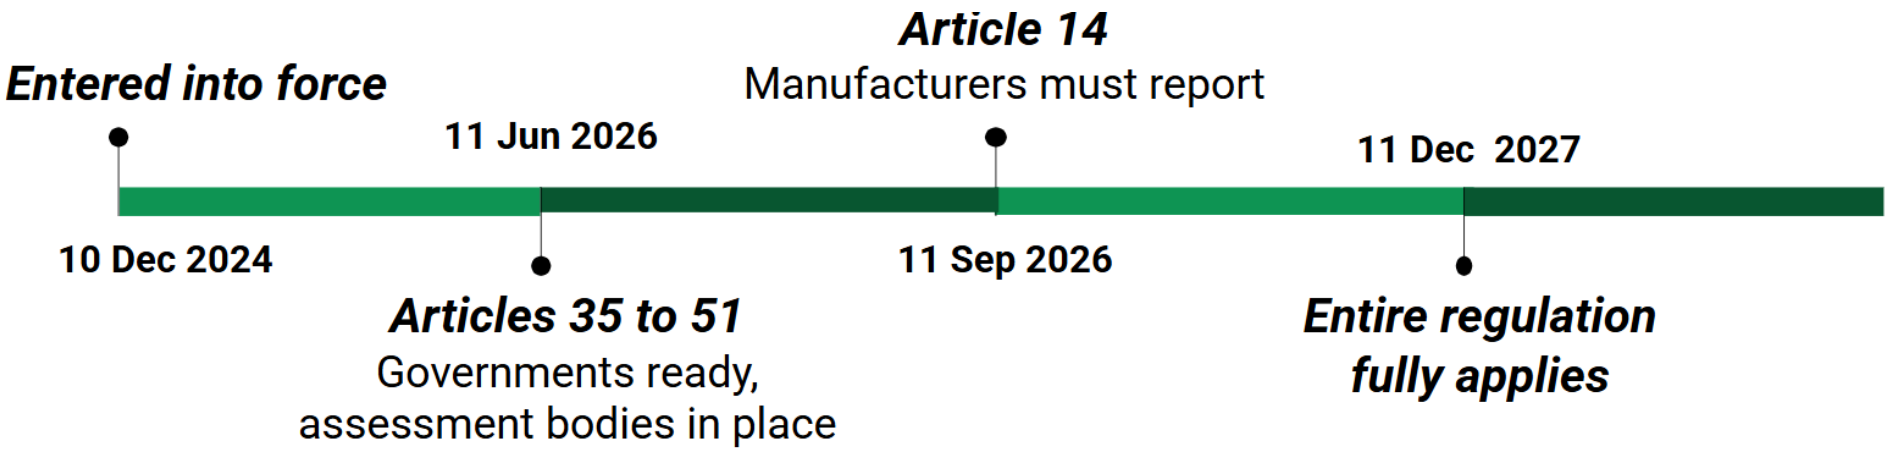
- Title: Essential cybersecurity requirements for **firewalls**, **intrusion detection and/or prevention systems**
- Draft version 0.0.2
- Work item was just adopted

Other general details

- WG EUSR has a new chair – Sandra Feliciano
- Almost all the drafts are in an early draft
- They progress well
- Two new WIs approved
- They are dependent on the vocabulary works at CEN/CENELEC
- They have an intention to include mappings between the standards and CRA

Further implementation steps

CRA timeline



There is a new draft for product categories – Class I

1. Identity management systems and privileged access management software and hardware, including authentication and access control readers, including biometric readers
2. Standalone and embedded browsers
3. Password managers
4. Software that searches for, removes, or quarantines malicious software
5. Products with digital elements with the function of virtual private network (VPN)
6. Network management systems
7. Security information and event management (SIEM) systems
8. Boot managers
9. Public key infrastructure and digital certificate issuance software
10. Physical and virtual network interfaces
11. Operating systems
12. Routers, modems intended for the connection to the internet, and switches
13. Microprocessors with security-related functionalities
14. Microcontrollers with security-related functionalities
15. Application specific integrated circuits (ASIC) and field-programmable gate arrays (FPGA) with security-related functionalities
16. Smart home general purpose virtual assistants
17. Smart home products with security functionalities, including smart door locks, security cameras, baby monitoring systems and alarm systems
18. Internet connected toys covered by Directive 2009/48/EC of the European Parliament and of the Council1 that have social interactive features (e.g. speaking or filming) or that have location tracking features
19. Personal wearable products to be worn or placed on a human body that have a health monitoring (such as tracking) purpose and to which Regulation (EU) 2017/7452 or (EU) 2017/746 of the European Parliament and of the Council3 do not apply, or personal wearable products that are intended for the use by and for children

There is a new draft for product categories

Class II

1. Hypervisors and container runtime systems that support virtualised execution of operating systems and similar environments
2. Firewalls, intrusion detection and prevention systems
3. Tamper-resistant microprocessors
4. Tamper-resistant microcontrollers

Critical

1. Hardware Devices with Security Boxes
2. Smart meter gateways within smart metering systems as defined in Article 2(23) of Directive (EU) 2019/944 of the European Parliament and of the Council and other devices for advanced security purposes, including for secure cryptoprocessing
3. Smartcards or similar devices, including secure elements

Presumption of Conformity (art. 27)

- Products certified pursuant to a European cybersecurity certification scheme shall be presumed to be in conformity with cybersecurity requirements of the CRA
- European Commission empowered to adopt a delegated act to specify which schemes can be used to demonstrate conformity
- Presumption of conformity via European harmonized standards (*published in the Official Journal of the European Union*) also possible

EUCC implementation

enisa

EUROPEAN UNION AGENCY FOR CYBERSECURITY

Cyber Resilience Act implementation via EUCC and its applicable technical elements

Final version: 27/01/2025

The CRA implementation via EUCC and its applicable technical elements report is issued by ENISA based on a request of technical support for the preparation of the implementation of the CRA received from European Commission (July-2023), the subsequent follow-up feedback also provided by the European Commission on April 2024 and the updates in the latest text of the CRA 2024/2847 (23 October 2024).

https://certification.enisa.europa.eu/certification-library/eucc-certification-scheme_en
https://certification.enisa.europa.eu/publications/cyber-resilience-act-implementation-eucc-and-its-applicable-technical-elements_en

- EU Cybersecurity Certification Framework
- Voluntary scheme under EU CSA (Regulation (EU) 2019/881)
- Certification of ICT products and Protection profiles
- CABs must comply with art. 39 CRA and demonstrate that to the notifying authority
- ISO/IEC 17065 supports both schemes – CSA and CRA.
- Gaps that needs to be covered: some CRA ESRs, Increase the Target of Evaluation, Include remote data processing solutions

Essential Security Requirements (legally binding)

Annex I

Technical documentation

Annex VII

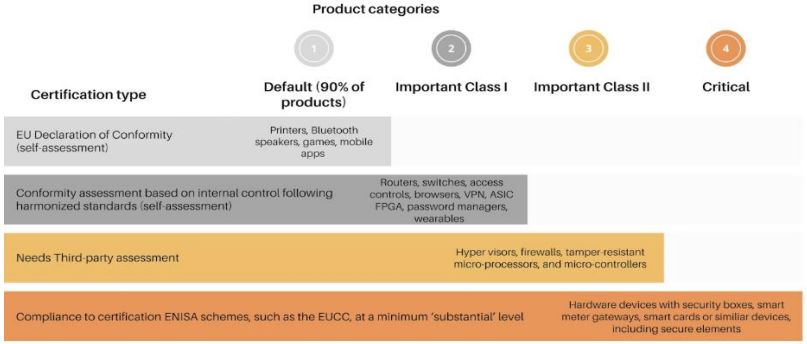
User instructions

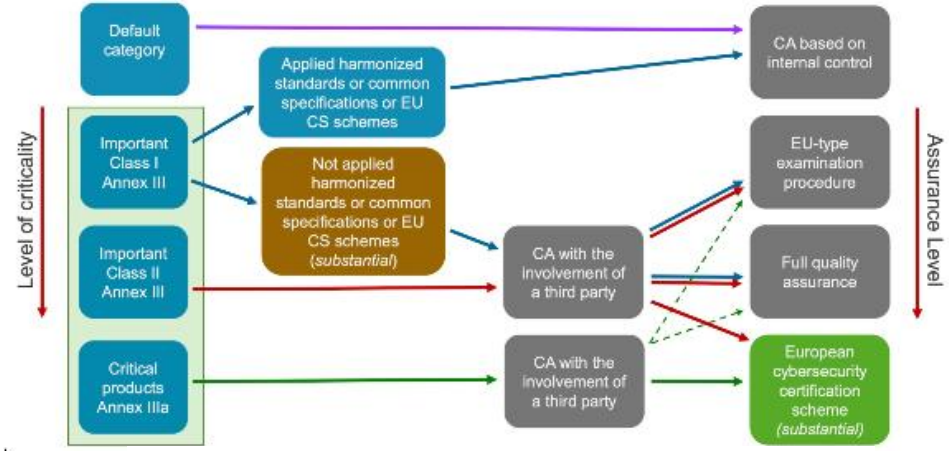
Annex II

Product and Manufacturer's Vulnerability Management processes

Requirements for proving the evidence of the conformance with CRA + requirements for installation, usage and decommissioning

Compliance mechanisms





Level	Description	Assurance
EAL 1	Functionally tested	Low
EAL 2	Structurally tested	
EAL 3	Methodically tested and checked	
EAL 4	Methodically designed, tested, and reviewed	Medium
EAL 5	Semiformally designed and tested	
EAL 6	Semiformally verified design and tested	
EAL 7	Formally verified design and tested	Highest

https://www.sgs.com/en/news/2025/03/cc-2025-q1-why-the-cyber-resilience-act-matters

Other implementation steps

- Guidance to support implementation (art.26)
  - Expected Q1 2026
  - CRA Expert Group will work on those
- EC insists on coherence and synergies between NIS2 and CRA - do not create conflicting standards/developments
- EUCC alignment with standards

AOB

AOB

- ETSI rapporteurs recommended our CRA class
- Team of liaison officers
  - Call for volunteers
  - People involved in other specifications groups or SDOs
  - Inputs prepared for every meeting (one slide, multiple slides, a .doc, etc.)
    - Especially related to CRA (indirect contributions to CRA e.g. ISO 2700x)
    - But also to other frameworks that could contribute to our Baseline
  - Please inform Madalin if you want to be part of this

I second this recommendation! It was remarkably fast and entertaining.
