Introduction

CRA Standardization request

EUROPEAN
COMMISSION

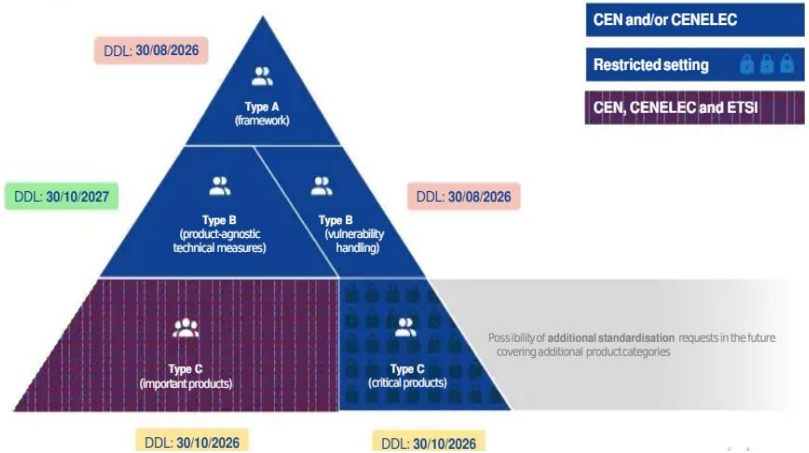
Brussels, 3.2.2025
C(2025) 618 final

COMMISSION IMPLEMENTING DECISION

of 3.2.2025

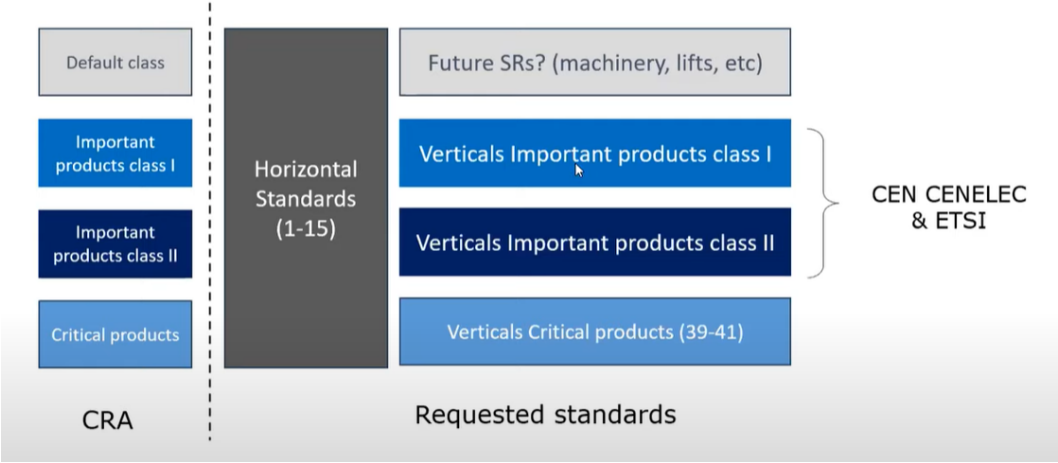
on a standardisation request to the European Committee for Standardisation (CEN), the European Committee for Electrotechnical Standardisation (Cenelec) and the European Telecommunications Standards Institute (ETSI) as regards products with digital elements in support of Regulation (EU) 2024/2847 of the European Parliament and of the Council of 23 October 2024 on horizontal cybersecurity requirements for products with digital elements and amending Regulations (EU) No 168/2013 and (EU) 2019/1020 and Directive (EU) 2020/1828 (Cyber Resilience Act)

https://ec.europa.eu/transparency/documents-register/detail?ref=C(2025)618&lang=en
https://cyberstand.eu/sites/default/files/2025-02/Filipe%20Slides%20CRA_implementation_Feb-2025.pdf



Horizontal standards (1-15)	Vertical standards (16-41)
• Risk-based approach (CRA Annex I) • Essential Requirements (CRA Annex I part 1) • Vulnerability Handling (CRA Annex I part 2)	• Important products class 1 (CRA Annex III) • Important products class 2 (CRA Annex III) • Critical products (CRA Annex IV)

CRA Standardization request



41 topics

3 ‘types’ of deliverables:

Category “A”: horizontal framework	Category “B”: product-agnostic technical measures & vulnerability handling	Category “C”: Important and critical products CRA Standardization Request 9 April 2025 36
• Only CEN and CENELEC • Topic #1 (JTC 13 WG9) • deadline 2026-08-30	• Only CEN and CENELEC • Topic #2-15 (JTC 13 WG9) • Deadline 2027-10-30 (except for line 15 - vulnerability handling - 2026-08-30)	• Topic #16-38: CEN, CENELEC and ETSI • deadline 2026-10-30 • Topic #39-41:CEN and CENELEC • Critical products

A section of the CEN, CENELEC and ETSI WP

Version: V1
Date: 2025-04-02

CEN, CENELEC and ETSI Work Programme
M/604- Cyber Resilience Act

M/606	Technical Committee(s)		M/606 - Planning for standard development						
Topics M606 - Annex I	TC ref.	TC title	In collaboration with	Work Item	Standard reference	Standard title	Last realized stage	Deadline for adoption	Comment
Line 1: European standard(s) on designing, developing and producing products with digital elements in such a way that they ensure an appropriate level of cybersecurity based on the risks									
1	CEN-CLC/JTC 13 WG 9	Cybersecurity and Data Protection	N/A	JT013089	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Cybersecurity requirements for products with digital elements Principles for cyber resilience	10.99 - NWI - New Work Item adopted	2026/08/30	
Lines 2-14 - European standard(s) CRA essential requirements									
2 to 14	CEN-CLC/JTC 13 WG 9	Cybersecurity and Data Protection	N/A	JT013091	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Cybersecurity requirements for products with digital elements – Generic Security Requirements	10.99 - NWI - New Work Item adopted	2027/10/30	
Line 15: European standard(s) on vulnerability handling for products with digital elements									
15	CEN-CLC/JTC 13 WG 9	Cybersecurity and Data Protection	N/A	JT013090	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Cybersecurity requirements for products with digital elements – Vulnerability handling	10.99 - NWI - New Work Item adopted	2026/08/30	
Line 16: European standard(s) on essential cybersecurity requirements for identity management systems and privileged access management software and hardware, including authentication and access control readers, including biometric readers									
16	CEN/TC 224 WG 17	Personal identification and related personal devices with secure element, systems, operations and privacy in a multi sectorial environment	CEN/TC 224 WG 17 (including expertise from WG 18,19 and 20) TC ESI	002242XX	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Identity management systems and privileged access management software and hardware, including authentication and access control readers, including biometric readers : criteria to fulfill with the essential requirements from regulation 2024/2487 (CRA)	TC decision taken	2026/10/30	
Line 17: European standard(s) on essential cybersecurity requirements for standalone and embedded browsers									
17a	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 617-1*	European standard(s) on essential cybersecurity requirements for embedded browsers	PWI - Proposed Work Item created	2026/10/30	
17b	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 617-2*	European standard(s) on essential cybersecurity requirements for standalone browsers	PWI - Proposed Work Item created	2026/10/30	
Line 18: European standard(s) on essential cybersecurity requirements for password managers									
18	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 618*	European standard(s) on essential cybersecurity requirements for password managers	PWI - Proposed Work Item created	2026/10/30	
Line 19: European standard(s) on essential cybersecurity requirements for software that searches for, removes, or quarantines malicious software									
19	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 619*	European standard(s) on essential cybersecurity requirements for software that searches for, removes, or quarantines malicious software	PWI - Proposed Work Item created	2026/10/30	
Line 20: European standard(s) on essential cybersecurity requirements for products with digital elements with the function of virtual private network (VPN)									
20a	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9 CLC/TC 65X WG3 mode 2	*(Will be be defined after the adoption of the Work Item)*	*EN 304 620*	European standard(s) on essential cybersecurity requirements for products with digital elements with the function of virtual private network (VPN)	PWI - Proposed Work Item created	2026/10/30	
20b	CLC/TC 65X WG 3	Industrial-process measurement, control and automation	ETSI TC Cyber EUSR Mode 2	81652	*EN 62443-5-XX (Will be be defined after the activation of the Work Item)*	Security Profile for products with digital elements with the function of virtual private network (VPN)	00.60 - PWI - Preliminary Work Item created	2026/10/30	
Line 21: European standard(s) on essential cybersecurity requirements for network management systems									
21a	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9 CLC/TC 65X WG3 mode 2	*(Will be be defined after the adoption of the Work Item)*	*EN 304 621*	European standard(s) on essential cybersecurity requirements for network management systems	PWI - Proposed Work Item created	2026/10/30	
21b	CLC/TC 65X WG 3	Industrial-process measurement, control and automation	ETSI TC Cyber EUSR Mode 2	81650	*EN 62443-5-XX (Will be be defined after the activation of the Work Item)*	Security Profile for network management systems (based on IEC 62443)	00.60 - PWI - Preliminary Work Item created	2026/10/30

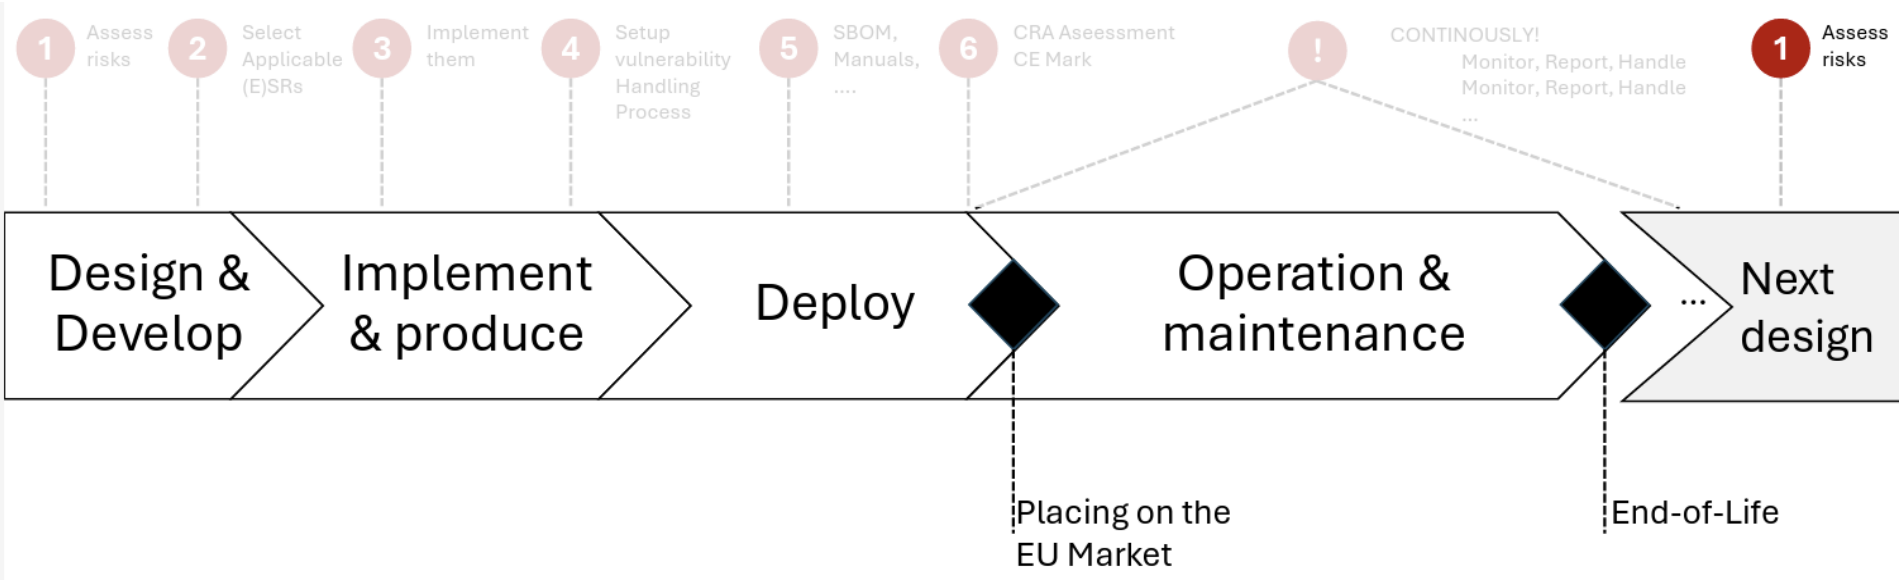
Extra CyberStand Call targeted to contributors to the CRA verticals

https://cyberstand.eu/9th-specific-service-procedure

CRA compliance and Product life cycle



Standards developed under CEN/CENELEC

CEN/CENELEC Work Programme

Project Team 1	Project team 2	Project team 3

• **Cybersecurity requirements for products with digital elements – Principles for cyber resilience**
• WI number – JT013089
• CRA requirement Annex I, Part I, 1
• M/606 item 1, 30/08/2026
• Does not (directly) provide a presumption of conformity.
• Addressing the process activities for security risk management during the total product life cycle.
• Activities are described as:
  • Expected inputs
  • Requirement
  • Expected outputs
  • Assessment criteria
• As a horizontal framework standard, it will not mandate any specific methodologies.
	• **Cybersecurity requirements for products with digital elements – Generic security requirements**
	• WI number : JT013091
	• CRA requirement Annex I, Part I, 2
	• M/606 items 2-14, 30/10/2027
	• Does not provide a presumption of conformity.
	• Addressing the essential product requirements.
	• Provides a library of security controls with their objectives and more technical assessment criteria.
	• Provides a mapping of the essential requirements to these security controls.
	• Builds upon the EN 18031:2024 series, augmented with additional security controls.
		• **Cybersecurity requirements for products with digital elements – Vulnerability handling**
		• WI number : JT013090
		• CRA requirement Annex I, Part II
		• M/606 item 15, 30/08/2026
		• The only horizontal standard of the three that hopefully might be suited for citation to provide a partial presumption of conformity.
		• Addressing the process activities for vulnerability handling.
		• Perceived as a horizontal standard that the verticals should be able to normatively reference with no or minimal adoptions.
		• Strong normative dependency on the SOTA standards EN ISO/IEC 30111 and 29147.

CEN/CENELEC JTC 13 WG9 Work Programme

Project 1

High level process **activities** to address the Total Product Life Cycle, defining:

- Goal that needs to be achieved
- Mandatory and optional inputs
- Minimum expected outcomes

Process activities such as security monitoring, risk assessment, verification, validation and release

Project 3

More detailed process **activities** (with assessment criteria fit for a presumption of conformity) to address the vulnerability management requirements

During risk assessment the appropriate security controls and their appropriate level can be selected to ensure risks are mitigated to an acceptable level

Risk assessment

Product requirements

Project 2

A mapping of the essential product requirements to a list of appropriate **security controls** at various levels

(controls have their own scale/levels to achieve the goal of the security control)

During the elicit requirements activity the deliverables from project 2 can be used to determine and select the appropriate security controls that should be implemented into the product to fulfil on a risk-based manor the essential requirements

CEN/CENELEC WP – actual status

- PT1 and Vocabulary are submitted to the NSBs enquiry
  - 14 oct 2025 – 1 Jan 2026
- PT3 is delayed
- PT2 will resume in two weeks

1. Security by design
2. No known vulnerabilities
3. Secure by default when placed on EU market
4. Security updates
5. Access control (to PwDE)
6. Confidentiality protectio
7. Integrity protection
8. Data minimization
9. Basic functionality available despite of incident
10. Minimize negative impact around PwDE
11. Limit attach surface
12. Mitigation of incidents
13. Recording & monitoring
14. Deletion of data & settings by end-user

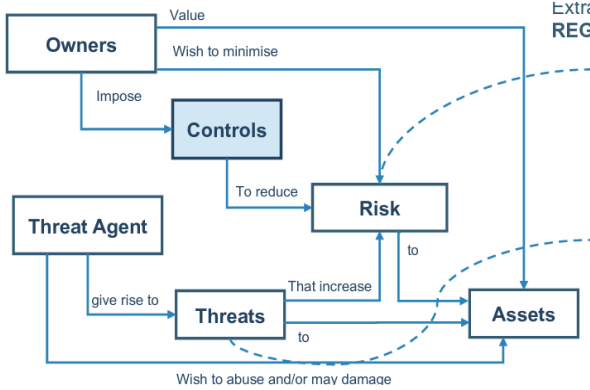
14

Requirements on product

1. Identify and document components and vulnerabilities
2. Address vulnerabilities
3. Perform regular security testing
4. Publish fixed vulnerabilities
5. Implement and practice vulnerability disclosure policy
6. Support 3rd party reporting
7. Ensure secure distribution of updates
8. Dissemination of updates

8

Requirements on vulnerability handling



Extract from:
REGULATION (EU) 2024/2847 (CRA)

- (37) '**cybersecurity risk**' means the potential for loss or disruption caused by an incident and is to be expressed as a combination of the magnitude of such loss or disruption and the likelihood of occurrence of the incident;
  ….
- (40) '**vulnerability**' means a weakness, susceptibility or flaw of a product with digital elements that can be exploited by a cyber threat;
  ….

Security Objective #n
Initial draft in progress
Security Control #1
Security Control #n

PT2 - JT013091

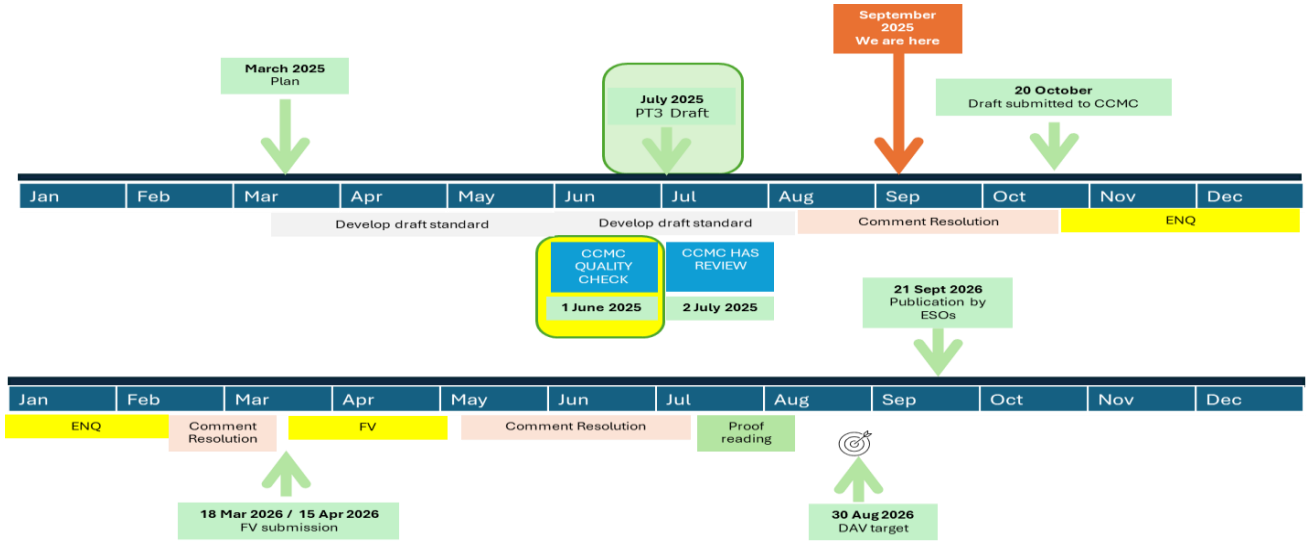
- On hold -> All the meetings are cancelled until 20 October
  - Focus on PT3
- Rely on EN 18031, IEC62443 and NIST SP800-53
  - Gap analysis
  - Mapping on PT2 requirements
- Structure – Requirements catalogue
  - Vulnerability management
  - Security by default
  - Secure SW-update
  - Secure storage
  - Secure communication mechanism
  - Logging mechanism
  - Authentication mechanism
  - Access control
  - User notification mechanism
  - Confidentiality
  - Integrity
  - Data minimization
  - Recovery from incidents
  - External impact limitation
  - Attack surface reduction
  - Reduction of the impact of an incident
  - Recording and monitoring of security activities
  - Deletion mechanism

  + Recommendations for additional requirements

Madalin & David will work on some comments for that one in the next days

PT3

- The commission is still considering the full presumption of conformity on the scope of the PT3 if we address the comments of the Harmonized Standards consultant. The partial presumption is still an option.
- EC assessed and provided comments for PT3



- Vulnerability Assessment
- Secure Configuration
- Security updates
- Authorized access
- Confidentiality
- Integrity
- Data minimization
- Availability
- Minimize negative impact
- Attack surface minimization
- Incident impact reduction
- Logging and monitoring
- Secure deletion

PT3

ISO/IEC 29147:2018

- Focuses on actions visible to the outside
  - Policies to deal with vulnerabilities
  - How to receive vulnerabilities
  - How to publish information
- Main sections
  - Vulnerability disclosure policy
  - Receiving Vulnerability Reports
  - Publishing Vulnerability Advisories
  - Coordination

ISO/IEC 30111:2019

- Focuses on handling procedures within the organization
  - Role and responsibilities
  - Definition of the phases on how to handle vulnerabilities
  - Process to monitor the vulnerabilities
- Main sections
  - Policies and organizational framework
  - Vulnerability handling phase
    - General, Preparation, Receipt, Verification, Remediation, Development, Release, Post-release
  - Process monitoring
  - Confidentiality of vulnerability information
  - Supply chain considerations

Key information

- https://portal.etsi.org/home.aspx
- All the works are under the control of TC CYBER WG EUSR https://portal.etsi.org/tb.aspx?tbid=919&SubTB=919#/
- The work programme and the meeting schedule can be found navigating on that page
  - Very intense meeting schedule
  - They have monthly joint meetings with CEN and CENELEC
- Their Forge https://forge.etsi.org/rep/cyber/stan4cr2
  - Only 10 standards (among 18) are developed using markdown
  - The links are also displayed on the WI page
- Complementary information resource: https://www.stan4cra.eu/
  - Funding opportunities: https://cyberstand.eu/8th-specific-service-procedure
- Links for Public Consultation on ETSI standards
  - https://docbox.etsi.org/CYBER/EUSR/Open
  - https://labs.etsi.org/rep/stan4cra/

ETSI Public Consultation

- Previewed by a webinar on 29 September
- From late October onwards
  - **Piloting their public consultation at the end of September**
    - https://docbox.etsi.org/CYBER/EUSR/Open
    - https://labs.etsi.org/rep/stan4cra/
    - Pilot standards: Routers, Hypervisors, OS, NI, Boot Managers, Password Managers and Firewalls
    - Everyone will have access to those standards for submitting comments
  - In collaboration with CEN/CENELEC
    - Further details will be provided on Stan4CRA website or ETSI website
      - Specific formal commenting and feedback window
      - Option to comment via ETSI Labs or traditional commenting table
      - Drafts will be available on both ETSI labs and CYBER open portal area
- Standards will be ultimately approved by NSBs
  - Another opportunity to comment via NSB national commenting

ETSI Public Consultation

- Instructions for submitting feedback can be found in the readme.md files available with every standard.
  There are two official submission options:
  - Directly in the .md file or related to the .pdf files from the labs.etsi.org repositories.
  - Via an Excel template available on docbox.etsi.org.
- Important detail: I heard during the last WG CYBER EUSR meeting that a deep-dive session will be held to resolve the public comments, and *only those who officially submit comments/feedback will be invited.*
- Therefore, my strong suggestion is to submit your feedback using one of the two official ETSI options listed above.
- For our internal WG consultation:
  - we have also put the available .md files into a shared Google Drive for your convenience to enable a preliminary discussion at our WG level: https://drive.google.com/drive/folders/1kg-U9KmgdjQjtC8OigdwJpwGBlBx_lHv?usp=sharing
  - We remain fully available to discuss any doubts, topics, or unclarities you may have related to these standards.
  - We will reserve time during the Standardization SIG meetings and can schedule additional meetings as needed.

Other ETSI standards

ETSI launched a new TC - QT

- The ETSI Board has recently approved the creation of a new Technical Committee on Quantum Technologies
- The primary objective of the technical committee is to develop specifications that address quantum communications and quantum networks across multiple sectors, deploying quantum-based solutions to lay the foundations for secure global communications networks
- Key Areas of Activity:
  - **Quantum Communications**: Secure data transmission using quantum principles like superposition and entanglement.
  - **Quantum Networking**: Connecting quantum systems for distributed computing and cryptography.
  - **Quantum Sensing**: Enabling ultra-precise measurements for quantum communication networks.
  - **Satellite Quantum Communications**: Standardising beacon signals, interfaces, and security for space-based quantum systems.
  - **Quantum Random Number Generators** (QRNGs): Generating true randomness for secure applications.
  - **Quantum Security**: Establishing methodologies to assess hardware vulnerabilities and side-channel attack risks.
- TC QT will also play a key role in supporting the European Quantum Communication Infrastructure (EuroQCI)
- I think it will pick up the activities from
  - ETSI ISG QKD
  - ETSI TC CYBER WG QSC

press release

ETSI TS 103 732 Series

- Consumer Mobile Devices smartphones, provide access to many digital services, from identity services to banking.
- The nature of mobile devices, being carried constantly with internet connectivity, makes them unique compared to most products.
- Under CRA they are not having a dedicated vertical standard
- But they have TS 103 732, written as a Protection Profile, providing a set of requirements that cover the general set of security functionality to protect the user data on the device.
  - Covers multiple modules – Base, Biometrics, Multi User, Preloaded Apps, Bootloader and Root of Trust)
- CRA integration
  - A preliminary TS 104 071 published in July 2025 to analyse the gaps between TS 103 732 and CRA and some suggestions to fill them
  - Next step -> start a new version for TS 103 732 to be CRA compatible

CRA standards unlocked – deep dive session from 13 Oct

- Held yesterday
- https://www.cencenelec.eu/media/CEN-CENELEC/Events/Webinars/2025/2025-10-13_webinar_cra-standards-unlocked-navigating-smartcards-secure-element-compliance-under-cra.pdf
- Agenda:
  1. Introduction
  2. Risk assessment principles
  3. Use case details: Governmental ID
  4. CRA compliance evaluation principles

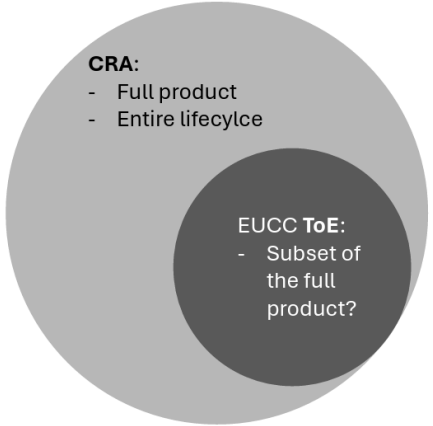
EUCC

CRA compliance (CEN/CENELEC view)

1	2	3
Assessment according to this standard:	Via EUCC evaluation and certification:	Manufacturer's own process:
▪ Lowest effort for manufacturer and for the evaluator ▪ Shortest time-to-compliance	▪ Effort to 'close the gap' between ToE and scope of the CRA harmonised standard ▪ More time needed for EUCC but no additional effort for CRA evaluation (presumption of conformity)	▪ Highest effort for manufacturer ▪ Highest effort for an evaluator ▪ Potentially unpredictible time-to-comply

https://www.cencenelec.eu/media/CEN-CENELEC/Events/Webinars/2025/2025-10-13_webinar_cra-standards-unlocked-naviga ing-smartcards-secure-element-compliance-under-cra.pdf

CRA compliance via EUCC (CEN/CENELEC view)



"ToE may have a focus on less than what is in the scope of the CRA.

Manufacturer shouldexamineharmonized standard(s) and additional documentation.
Gaps are to be closed by new or updated Security Target / Protection Profile.

Otherwise, presumption of CRA conformity cannot be claimed."

ENISA pilots

1. EUROSMART PP-0084
2. ORACLE-Java Card System with TUVIT
3. Veritas Bureau - ESMIG
4. AWS- Remote Data Processing
5. JTSEC-Network Devices NDcPP with CISCO
6. ETSI - Mobile Device Fundamentals
7. TrustCB-SGS- CISCO-Network Devices-Firewall.
8. SGS-GMV Product CosmicGuard Certificate without PP.
9. TrustCB-SGS-CISCO NDcPP.

ENISA pilots

SELECTED DEP PILOTS

1. ATSEC-Hard Copy Devices
2. SUSE&ATSEC-Operative System
3. KERNKONCEPT-L4Re Secure Separation Kernel
4. DEKRA- Ekinops - Network Devices NDcPP
5. SRC-Point of Interaction
6. Nilfisk A/S - Red Alerts Labs – Product -SC 25 autonomous floor treatment machine
6. TUVIT - NXP-Java Card System
8. CRL Labs - THALES-Machine Readable Travel Document
9. Data Diode PP

AOB

Public consultation to gather your views on revising the EU Standardisation Regulation

- EU launched a public consultation to gather your views on revising the EU Standardisation Regulation.
- This is your opportunity to contribute to a strategic, future-proof approach to standardisation in Europe
- Are you interested in making the European standardisation system faster, more transparent, and open to all, including startups, SMEs and civil society?
- Contribute by 17 December: https://ec.europa.eu/info/law/better-regulation/info/law/better-regulation/have-your-say/initiatives/14511-Standardisation-Regulation-revision_en

CRA Guidelines

Thank you very much
