Public Inquiry for CEN Horizontal Standards

- PT1 and Vocabulary have ended their public inquiry phase
  - Endorsed by National Bodies
  - Three meetings per week
  - They are discussing chapter 7 from PT3
  - as both were endorsed by NSOs, CEN is hesitating to address major changes
- PT2
  - Has resumed its activities on 2 December
  - They really need contributions
  - It's the only horizontal that will be delivered in 2027
  - Move forward with EN 18031 Baseline
  - Two days of meetings (8h in total/week)
  - Public Inquiry phase is planned for 3 months in May-July 2026
- PT3
  - CEN sent PT3 (40000-1-3) to the NSBs to initiate the ENQ phase at the beginning of December
  - Out for Public inquiry
    - available at NBN – deadline: 9 Feb
    - Deadline at EVS – 28 February
    - Deadline BSI UK – 3 February
    - Deadline ASI – 12 February
    - Deadline UNE – 14 February
  - Still not clear if it will get the presumption of conformity
  - Expected to be published in October 2026
  - Comment resolution will start in March
  - 31 pages submitted by HAS consultants

	Oct-25	Nov-25	Dec-25	Jan-26	Feb-26	Mar-26	Apr-26	May-26	Jun-26	Jul-26

Public Inquiry for CEN Vertical Standards

- prEN 50764
  - Smartcards or similar devices, including secure elements
  - Important Class II
  - 3rd party assessment
  - Enquiry stage
- prEN 50765
  - Microprocessors and microcontrollers with security-related functionalities
  - Important class I
  - Enquiry stage
  - Self-assessment
- prEN 50766
  - Tamper-resistant microprocessors and microcontrollers
  - Important Class II
  - 3rd party assessment
  - Enquiry stage
- prEN 50767
  - FPGA/ASICs
  - Important class I
  - HAS assessment
  - Self-assessment

ETSI Open/Public Consultation

- Information website on CRA standards at : www.stan4cra.eu
- Open area for the CRA Vertical draft standards : https://docbox.etsi.org/CYBER/EUSR/Open
- Online consultation platform on working drafts at : https://labs.etsi.org/rep/stan4cra/
- Comments handled by batch on a monthly basis since September 2025 and until the end Q1 2026
- Almost all the drafts were already submitted for HAS assessment
- In January another 28 comments were received
  - SEL4 Foundation
  - ISG NFV
- Escalation on PKI standard (by TC ESI and others)

ETSI (upcoming) deep-dive sessions

These sessions will focus on the following topics:

- Consumer IoT
  - On February 6, between 2PM and 5PM CET
  - Registration link: https://portal.etsi.org/Meetings.aspx#/meeting?MtgId=84021
  - To connect: https://meet.goto.com/etsicybereusr/deep-dive-sessions

As before, this remaining session is open to the general public and are designed to provide detailed insight into the ongoing work by ETSI rapporteurs.
They also offer an excellent opportunity for participants to explore draft standards and share feedback.

Previous Deep Dive sessions

- Routers, Modems and Switches
- Hypervisors and container runtime systems
- Firewalls
- Browsers
- SIEM Systems
- OS
- Antivirus

Event	Speakers	Start	End
Sunday			
Welcome to the SBOMs and Supply Chains devroom!	Alexios Zavras (zvr), Kate Stewart, Adolfo García Veytia, Thomas Steenbergen	09:00	09:10
The day in a life of a SBOM	Anthony Harrison	09:10	09:30
When One Product Has Three SBOMs: Lessons from Embedded Vulnerability Management	Marta Rybczynska	09:30	10:00
Contextual SBOMs and impact on vulnerability management	Erik Mravec, Martin Jediný	10:00	10:30
Beyond SBOM: Integrating VEX into Open Source Workflows	Piotr P. Karwasz	10:30	11:00
From Passive Data to Active Defense: Supply Chain Policy-as-Code with Conforma	Stefano Pentassuglia	11:00	11:30
CRA-Ready SBOMs: A Practical Blueprint for High-Quality Generation	Viktor Petersson	11:30	12:00
Deutsche Bahn's Approach to Large-Scale SBOM Collection and Use	Max Mehl, Henry Sachs	12:00	12:20
LibreOffice and Collabora Online - how we managed to automate SBOM generation for a large legacy project	Thorsten Behrens	12:40	13:00
Forget SBOMs, use PURLs	Philippe Ombredanne, Steve Springett	13:20	13:40
What is new in SPDX 3.1 which is now a Living Knowledge Graph	Karen Bennet	14:00	14:30
A semantic framework for modelling and analysing supply chains through SBOMs	Giacomo Tenaglia	14:30	15:00
C/C++ Build-time SBOMs with pkgconf	Ariadne Conill	15:30	16:00
Enhancing Swift's Supply Chain Security: Build-time SBOM Generation in Swift Package Manager	Ev Cheng, Sam Khouri	16:00	16:30
Generating SBoMs for BuildStream projects	Abderrahim Kitouni	16:30	17:00

Complementary standards

ITU-T SG17

- "Framework for Cyber Resilience Testing and Assurance"
  - To assess software products resilience to threats and the establishment of assurance principles and claims document
  - Its relevance to connected products will help ensure confidence that they are safeguarded against malicious activity originating from public domains
  - This document aligns assurance principles with claims, outlining the scope of the assurance activities and specifying the level of information needed for evaluation.
- Cyber Security Reference Architectures, Methodologies, Models and Strategies (CRAMMS) Roadmap
  - TR
  - Outlines the context, key drivers, and structured approach for a future-proof ITU-T SG17 standardization strategy and roadmap
  - Examines challenges, opportunities, and forces of change in the global digital ecosystem to inform strategic directions
  - Introduces a holistic framework to classify and guide development of standards supporting secure, resilient, and trustworthy digital systems

TC CYBER SSDIF

- Translation of NIST SSDF tasks into an ETSI standard that could be easier to be referenced
- Under the remote consensus until the end of this week

Title	Cyber Security (CYBER); Software Security Development and Implementation Framework SSDIF
Scope and Field of Application	The proposed work item will provide specific usable guidance differentiated by available resources for three parties in the software ecosystem toward implementing evaluable, effective software security. For end user customers, it will specify what to ask for and what steps to take. For software development organizations, it will specify what to do. For governmental or industry bodies, it will define the specifics to demonstrate that secure by design practices have been followed.
Supporting Organizations	Cadzow Communications, SBS aisbl, NCSC, CIS, Palo Alto Networks

Have your say

Public Consultation on European Open Digital Ecosystem Strategy

- https://ec.europa.eu/info/law/better-regulation/have-your-say/initiatives/16213-European-Open-Digital-Ecosystems_en
- The European Open Digital Ecosystem Strategy will set out:
  - a strategic approach to the open source sector in the EU that addresses the importance of open source as a crucial contribution to EU technological sovereignty, security and competitiveness
  - a strategic and operational framework to strengthen the use, development and reuse of open digital assets within the Commission, building on the results achieved under the 2020-2023 Commission Open Source Software Strategy.
- Deadline – 3 February
- OpenSSF has contributed to the LFEU answer

European Standardisation Panel Survey

- Previous version of EU Standardisation Panel Survey: https://op.europa.eu/en/publication-detail/-/publication/d5c4f1a7-e75e-11ee-9ea8-01aa75ed71a1/language-en

- The Commission has launched the second edition of the European Standardisation Panel survey to gather input from the industry and other stakeholders on their standardisation needs, to boost innovation and European competitiveness
- OpenSSF, JDFP and LFEU submitted correlated answers

ENISA’s calls for feedback

- **Advancing Software Supply Chain Security together**
  - draft report
  - You may provide your feedback by **23 January 2026 at 23:59 CET** by taking part in the survey
  - We created a document to collect your feedback
- **ENISA Technical Advisory for Secure Use of Package Managers**
  - draft document
  - You may take part in the consultation for the Technical Advisory **by 23 January 2026, 23:59 CET** through the following link
  - We created a document to collect your feedback
- OpenSSF has submitted answers to both of them
  - Thank you to Olle and Tanya for their inputs

AOB

Thanks, and a promise: A better future!

You

- Pour your heart into developing FOSS
- Sacrifice your time for the common good
- Create the digital building blocks our society depends on
- Help to build our future

We

- Appreciate this gift you are giving to the whole society
- Want to say THANK YOU!
- Promise the CRA will help you
- Know that words are nice, but practical help/support is better

ECCC publishes new call for proposals under Digital Europe Programme

- https://cybersecurity-centre.europa.eu/news/eccc-publishes-new-call-proposals-under-digital-europe-programme-2025-10-22_en
- The call Cyber 09 focuses on critical areas of cybersecurity deployment and covers the following topics:
  - Cybersecure tools, technologies and services relying on AI
  - Uptake of innovative cybersecurity solutions for SMEs
  - Coordinated preparedness testing and other preparedness actions
  - Regional Cable Hubs

Funding for SMEs

- The SECURE project (secure4sme.eu), funded under the Digital Europe Programme, launched a first round of financial support measures to help small businesses achieve compliance with new cybersecurity requirements for their hardware and software products.

- This will allow micro, small and medium enterprises (MSMEs) to request co-funding to strengthen the cybersecurity of their hardware and software products to ensure compliance with the CRA.

- As part of the first round of financial support measures offered by the SECURE project, MSMEs may request co-funding for certain activities with a **maximum of EUR 30.000**. Requests can be submitted from 28 January to 29 March 2026.

1st Call Total Budget	€ 5 million
Funding per grant	Up to € 30,000
Target applicant	Micro, small and medium-sized enterprises (MSMEs)
Co-financing	50%
First call	28 January 2026 - 29 March 2026

SECURE
Cyber Resilience for SMEs

ETSI TS 104 008

- Methods for Testing & Specification (MTS); Continuous Auditing Based Conformity Assessment for AI-enabled systems
- Framework for Continuous Auditing-Based Conformity Assessment (CABCA)
- This framework helps organisations ensure their AI systems remain compliant with regulatory and technical requirements throughout their entire operational lifecycle
- ETSI TS 104 008 addresses this challenge by establishing a structured methodology for automated, ongoing conformity assessment, supporting the post-market monitoring obligations of the EU Artificial Intelligence Act.

Standards are key to agentic AI security and digital IDs

- https://www.itu.int/hub/2026/01/why-standards-are-key-to-agentic-ai-security-and-digital-ids/
- In the process of establishing a new working group, Question 16/17: AI Security,
  - merging its Questions 3/17 and 10/17 working on digital identity for agentic AI.
- The critical 3 connected workshops coming:
  - 30-31st of March SG17 Workshop in Geneva during the 1st Content Week **Trustable and Interoperable Digital Identities for Human and Agentic AI**
  - (provisional) 3rd of June SG17 Workshop in Geneva during 5th SG17 Plenary Meeting - **Globally interoperable digital identity**
  - (provisional) 10th of July SG17 Workshop in Geneva during AI for Good - **Designing the Trust Management for Agentic AI**

EU and Japan hold 7th Cyber Dialogue in Brussels

- Cyber: European Union and Japan hold 7th Cyber Dialogue in Brussels
- Further **cooperation on synergies** between the CRAand the Japanese JC-STAR labelling scheme to enhance the resilience of our markets

+

- UK-Japan strategic cyber partnership announced on 31 January
  - Share cyber threat intelligence
  - Share best practices
  - Build a growth and innovation ecosystem by cooperation

ECMA Contributing.yaml specification

- ECMA TC54 TG4
- https://tc54.org/contributing-yaml/
- https://ecma-international.org/task-groups/tc54-tg4/
- Ecma TC54-TG4 is chartered with the standardization of Contributing JSON, an open contributions specification to enable the structured and machine-readable communication of an open source community's or project's state, needs, and support intentions. This includes codifying maintainers' support levels, signalling calls for assistance, identifying abandonment or handoff status, and improving visibility into whether a project is viable for commercial or long-term use. The Contributing JSON specification aims to support software supply chain risk assessment, organisational investment decisions, and community sustainability efforts.

Global Platform SESIP

- The Security Evaluation Standard for IoT Platforms (SESIP)
- https://globalplatform.org/sesip/
- SESIP has been adopted by CEN and CENELEC as a European Standard (EN 17927)
- A methodology that reduces the cost, complexity and effort of security evaluation and certification
- The methodology maps to other standards and requirements from bodies including ETSI, ISO/IEC and NIST, which demonstrates a risk-based design approach and helps lower barriers to entry

CEN/CENELEC Work Programme

Project Team 1	Project team 2	Project team 3

• **Cybersecurity requirements for products with digital elements – Principles for cyber resilience**
• WI number – JT013089
• CRA requirement Annex I, Part I, 1
• M/606 item 1, 30/08/2026
• Does not (directly) provide a presumption of conformity.
• Addressing the process activities for security risk management during the total product life cycle.
• Activities are described as:
  • Expected inputs
  • Requirement
  • Expected outputs
  • Assessment criteria
• As a horizontal framework standard, it will not mandate any specific methodologies.
	• **Cybersecurity requirements for products with digital elements – Generic security requirements**
	• WI number : JT013091
	• CRA requirement Annex I, Part I, 2
	• M/606 items 2-14, 30/10/2027
	• Does not provide a presumption of conformity.
	• Addressing the essential product requirements.
	• Provides a library of security controls with their objectives and more technical assessment criteria.
	• Provides a mapping of the essential requirements to these security controls.
	• Builds upon the EN 18031:2024 series, augmented with additional security controls.
		• **Cybersecurity requirements for products with digital elements – Vulnerability handling**
		• WI number : JT013090
		• CRA requirement Annex I, Part II
		• M/606 item 15, 30/08/2026
		• The only horizontal standard of the three that hopefully might be suited for citation to provide a partial presumption of conformity.
		• Addressing the process activities for vulnerability handling.
		• Perceived as a horizontal standard that the verticals should be able to normatively reference with no or minimal adoptions.
		• Strong normative dependency on the SOTA standards EN ISO/IEC 30111 and 29147.
