Public inquiry phase for CRA-related standards

CRA Work Items

CRA	M/606 ID	Venue	Work Item	Standard reference	Standard title
		CEN-CLC/JTC 13 WG 9	JT013095	EN 40000-1-1	Cybersecurity requirements for products with digital elements – Vocabulary
I.I	2 to 14	CEN-CLC/JTC 13 WG 9 PT1	JT013089	EN 40000-1-2:2025	Cybersecurity requirements for products with digital elements – Principles for cyber resilience
I.II	2 to 14	CEN-CLC/JTC 13 WG 9 PT3	JT013090	EN 40000-1-3	Cybersecurity requirements for products with digital elements – Vulnerability Handling
	2 to 14	CEN-CLC/JTC 13 WG 9 PT2	JT013091	EN 40000-1-4	Cybersecurity requirements for products with digital elements – Generic Security Requirements
	2 to 14	CEN-CLC/JTC 13 WG 9	JT013097	TR 40000-1-5	Cybersecurity requirements for products with digital elements – Threats and Security Objectives
	2 to 14	CEN-CLC/JTC 13 WG 6	JT0130XX	TS TTTTTTT	Guidance for the application of EN 18037 in support of the CRA
	2 to 14	CEN-CLC/JTC 13 WG 6	JT0130XX	TR TTTTTT	Documentation of the EN 18037 assessment results for the Consumer IoT market sector
III.I.1	16	CEN/TC 224 WG 17		EN TTTTTTT	Identity management systems and privileged access management software and hardware, including authentication and access control readers, including biometric readers : criteria to fulfill with the essential requirements from regulation 2024/2487 (CRA)
III.I.2	17	ETSI CYBER-EUSR	DEN/CYBER-EUS-006	EN 304 617	Essential cybersecurity requirements for browsers
III.I.3	18	ETSI CYBER-EUSR	DEN/CYBER-EUS-007	EN 304 618	Essential cybersecurity requirements for password managers
III.I.4	19	ETSI CYBER-EUSR	DEN/CYBER-EUS-0018	EN 304 619	Essential cybersecurity requirements for software that searches for, removes, or quarantines malicious software
III.I.5	20a	ETSI CYBER-EUSR	DEN/CYBER-EUS-005	EN 304 620	Essential cybersecurity requirements for virtual private networks (VPNs)
III.I.5	20b	CLC/TC 65X WG 3	81652	EN 62443-5-XX	Security Profile for products with digital elements with the function of virtual private network (VPN)
III.I.5+6+7	20b+21b+22b	CLC/TC 65X WG 3	79830	EN IEC 62443-3-3:2019	Industrial communication networks - Network and system security - Part 3-3: System security requirements and security levels
III.I.5+6+7	20b+21b+22b	CLC/TC 65X WG 3	81487	EN IEC 62443-4-1:2018	Security for industrial automation and control systems - Part 4-1: Secure product development lifecycle requirements
III.I.5+6+7	20b+21b+22b	CLC/TC 65X WG 3	79973	EN IEC 62443-4-2:2019	Security for industrial automation and control systems - Part 4-2: Technical security requirements for IACS components
III.I.6	21a	ETSI CYBER-EUSR	DEN/CYBER-EUS-009	EN 304 621	Essential cybersecurity requirements for network management systems
III.I.6	21b	CLC/TC 65X WG 3	81650	EN 62443-5-XX	Security Profile for network management systems (based on IEC 62443)
III.I.7	22a	ETSI CYBER-EUSR	DEN/CYBER-EUS-0010	EN 304 622	Essential cybersecurity requirements for Security information and event management (SIEM) systems
III.I.7	22b	CLC/TC 65X WG 3	81654	EN 62443-5-XX	Security Profile for security information and event management (SIEM) systems (based on IEC 62443)
III.I.8	23	ETSI CYBER-EUSR	DEN/CYBER-EUS-008	EN 304 623	Essential cybersecurity requirements for boot managers

CRA Work Items

CRA	M/606 ID	Venue	Work Item	Standard reference	Standard title
III.I.9	24	ETSI CYBER-EUSR	DEN/CYBER-EUS-0015	EN 304 624	Essential cybersecurity requirements for public key infrastructure and digital certificate issuance software
III.I.10	25a	ETSI CYBER-EUSR	DEN/CYBER-EUS-0017	EN 304 625	Essential cybersecurity requirements for physical and virtual network interfaces
III.I.10	25b	CLC/TC 65X WG 3	81651	EN 62443-5	Security Profile for physical and virtual network interfaces (based on IEC 62443)
III.I.11	26	ETSI CYBER-EUSR	DEN/CYBER-EUS-0012	EN 304 626	Essential cybersecurity requirements for operating systems
III.I.12	27a	ETSI CYBER-EUSR	DEN/CYBER-EUS-0013	EN 304 627	Essential cybersecurity requirements for routers, modems intended for the connection to the internet, and switches
III.I.12	27b	CLC/TC 65X WG 3	81653	EN 62443-5	Security Profile for routers, modems intended for the connection to the internet, and switches (based on IEC 62443)
III.I.13+14	28, 29	CLC/TC 47X WG 1	80923	EN 50765	Essential cybersecurity requirements for microprocessors and microcontrollers with security-related functionalities
III.I.15	30	CLC/TC 47X/WG CRA		EN 50767	Essential cybersecurity requirements for application specific integrated circuits (ASIC) and field-programmable gate arrays (FPGA) with security-related functionalities
III.I.16	31	ETSI CYBER-EUSR	DEN/CYBER-EUS-0011	EN 304 631	Essential cybersecurity requirements for smart home general purpose virtual assistants
III.I.17	32	ETSI CYBER-EUSR	DEN/CYBER-EUS-0014	EN 304 632	Essential cybersecurity requirements for smart home products with security functionalities, including smart door locks, security cameras, baby monitoring systems and alarm systems
III.I.18	33	ETSI CYBER-EUSR	DEN/CYBER-EUS-004	EN 304 633	Essential cybersecurity requirements for Internet connected toys covered by Directive 2009/48/EC that have social interactive features (e.g. speaking or filming) or that have location tracking features
III.I.19	34	ETSI CYBER-EUSR	DEN/CYBER-EUS-003	EN 304 634	Essential cybersecurity requirements for personal wearable products to be worn or placed on a human body that have a health monitoring (such as tracking) purpose and to which Regulation (EU) 2017/745 or Regulation (EU) 2017/746 do not apply or personal wearable products that are intended for the use by and for children
III.II.1	35	ETSI CYBER-EUSR	DEN/CYBER-EUS-0016	EN 304 635	Essential cybersecurity requirements for hypervisors and container runtime systems that support virtualised execution of operating systems and similar environments
III.II.2	36a	ETSI CYBER-EUSR	DEN/CYBER-EUS-0020	EN 304 636	Essential cybersecurity requirements for firewalls, intrusion detection and/or prevention systems
III.II.2	36b	CLC/TC 65X WG 3	81649	EN 62443-5	Security Profile for firewalls and intrusion detection and prevention systems (based on IEC 62443)

IV.1	39	CEN/TC 224 WG 17	002242XX	EN TTTTT	Cybersecurity requirements for Hardware Devices with Security Boxes
IV.2	40	CEN-CLC/JTC 13 WG 6	JT013102	prEN 40000-x-x	Cybersecurity requirements for products with digital elements – Smart Meter Gateway
IV.3	41a	CLC/TC 47X WG 3	80922	EN 50764	Cyber Resilience of EUCC certified platforms of Smart Cards and Similar Devices Including Secure Elements
IV.3	41b	CEN/TC 224 WG 17		prEN 18330	Cybersecurity requirements for smartcards or similar devices, including secure elements – Application layer
		ETSI CYBER-EUSR	DEN/CYBER-EUS-0019	EN 304 642	Cybersecurity Requirements for Network Functions of Telecommunications Systems

We 💗 ESOs

CRA has brought us closer to the ESOs

- Getting involved where it matters
- Create awareness
- A relationship built over a decade
- Scaling what already works

Linux Foundation and ETSI Further Collaborate to Drive Harmonization Across Open Source and Open Standards

THE LINUX FOUNDATION | 19 SEPTEMBER 2023

BILBAO, Spain—Open Source Summit Europe —September 19, 2023 – The Linux Foundation, the nonprofit organization focused on fostering innovation through open source, and ETSI, the independent organization providing global standards for ICT services across all sectors of industry, today announced expanded collaboration. While the two organizations have been working together for years, the 2019 formal Memorandum of Understanding (MOU) recently has been updated and expanded.

The formal link between our communities encourages and enables collaboration across communications, promotion and events, as well as common initiatives spanning Network Function Virtualization (NFV) / Cloud-native Network Functions (CNF), Artificial Intelligence, Software Defined Networking, Autonomous Networks, 5G/6G, and Edge Computing. Specific updates to the MoU include broader mapping of areas of interest to now include additional Linux Foundation project communities such as LF Networking's CNF initiatives, CAMARA, and Nephio, some of which were not yet created at the time of the initial MOU or its renewal. ETSI has also identified new areas of potential collaboration. These include zero touch network management and ETSI Open Source groups such as OSM and the recently created TeraFlowSDN.

"ETSI is pleased to extend our successful collaboration with the Linux Foundation, which has developed continually over the years," says Ultan Mulligan, ETSI's Chief Services Officer. "We have capitalized on this experience to create our own Software Development Groups. These groups will cater for the expected greater use of software in standardization of future technologies such as 6G and will help further extend ETSI's cooperation with the Linux Foundation."

"ETSI and the Linux Foundation have worked on harmonizing open source and open standards for the past several years, with examples spanning Cloud Native Functions descriptor specification implementations within projects such as ONAP," said Arpit Joshipura, general manager, Networking, Edge and IoT, the Linux Foundation. "We are looking forward to expanding this to areas across the stack enabled by automation and AI."

ETSI The Standards People

Certificate of Membership

This is to certify that

Linux Foundation Europe

is a Full member of ETSI since 22 September 2025

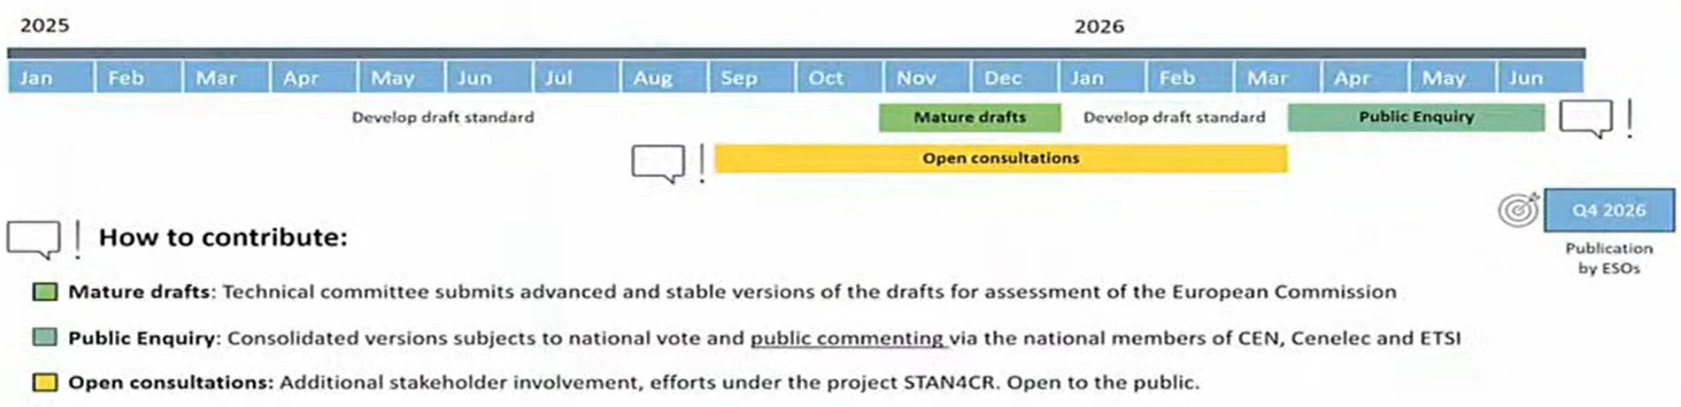
General Assembly #86
02 December 2025, Sophia Antipolis
Chair of the General Assembly

ETSI Director General
Chair of the Board

I'm very pleased to inform you that CEN and CENELEC Technical Boards (BTs) have approved **Linux Foundation Europe's** (LF Europe) application for the status of **Liaison Organization**

ETSI Open/Public Consultation

- Information website on CRA standards at : www.stan4cra.eu
- Open area for the CRA Vertical draft standards : https://docbox.etsi.org/CYBER/EUSR/Open
- Online consultation platform on working drafts at : https://labs.etsi.org/rep/stan4cra/
- Comments handled by batch on a monthly basis since September 2025 and until the end Q1 2026
- Deep dives: https://www.stan4cra.eu/events
- A few rapporteurs have been changed (OS, Browsers, Physical and Virtual Network interfaces, SIEM)
- Issue with the PKI standard – internal ETSI (WG EUSR <> TC ESI)



Public Inquiry for CEN Horizontal Standards

- **"Good is good enough" approach**
- PT1 and Vocabulary have ended their public inquiry phase
  - Endorsed by National Bodies
  - Three meetings per week
  - As both were endorsed by NSOs, CEN is hesitating to address major changes
  - New title for PT1: Cybersecurity requirements for products with digital elements - Part 1-2:Principles, product risk management, and lifecycle activities
- PT2
  - Has resumed its activities on 2 December
  - They really need contributions
  - It's the only horizontal that will be delivered in 2027
  - Move forward with EN 18031 Baseline
  - Two days of meetings (8h in total/week)
  - Public Inquiry phase is planned for 3 months in May-July 2026
  - Deliver 'what they can'
- PT3
  - A few places where the Public inquiry is still open
    - Deadline at EVS – 28 February
  - Still not clear if it will get the presumption of conformity
  - Expected to be published in October 2026
  - Comment resolution will start in March
  - 31 pages submitted by HAS consultants
  - ~50 pages submitted by OpenSSF

Ben Kokx • 1st
Director Standardization Product Security
1h •

On my way back from a week of CEN-CENELEC JTC 13/WG 9 meetings. I would like to thank VDMA for being such an excellent host, it was a pleasure to be in Frankfurt.

WG9 would like to have the horizontal standards available on time, which means preferably a year before manufacturers need to comply. All stakeholders need to have a good understanding of what is expected by all parties to be able to declare conformity for most of the products in scope of the CRA, and that before the 11th of December 2027.

With a large number of comments on the security-by-design principles document (prEN 40000-1-2) to both strengthen and weaken requirements, comments to restructure and to remove or add content, we have to make a decision. Do we want a prefect document which can't be achieved any time soon, as the maturity of the market is too diverse and achieving consensus will take time. Or do we want to create a good enough document and get it out there on time, where some might argue the requirements or assessment criteria are too high level, but still providing the necessary quality, which will allow manufacturers to implement these requirements at an adequate level. Then manufacturers, market surveillance authorities, test labs, notified bodies, the European commission and us as standardizers can all learn from the first implementations and improve requirements and assessment criteria in the next revision of the standard. WG9 decided to take the later "good is good enough" approach and will further consult with the European Commission, CCMC and JTC13 on the way forward.

	Oct-25	Nov-25	Dec-25	Jan-26	Feb-26	Mar-26	Apr-26	May-26	Jun-26	Jul-26
Vocabulary 40000-1-1										
PT1 40000-1-2										
PT2 40000-1-4										
PT3 40000-1-3										

ETSI & CEN deep dive sessions

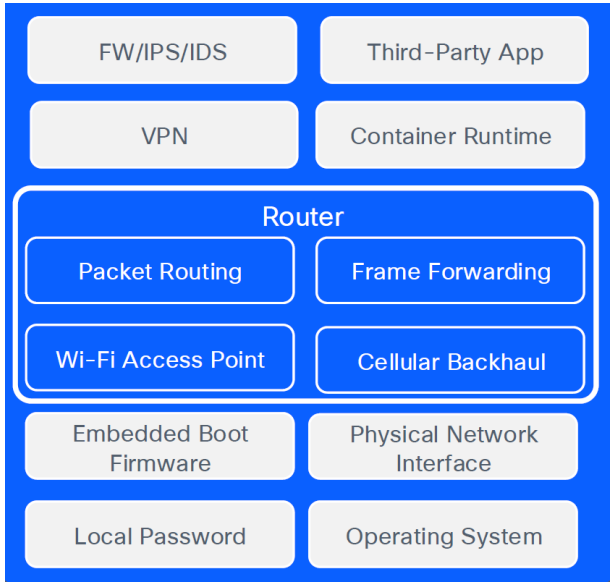
- Consumer IoT products
- Routers, Modems and Switches
- Hypervisors and container runtime systems
- Firewalls
- Browsers
- SIEM Systems
- OS
- Antivirus
- Physical and Virtual Network Interfaces
- NMS
- Boot managers
- Password Managers
- VPNs
- PKI and digital certificate issuance software

Next one – CEN deep dive on PT2

- Register
- 5 March
- Focuses on **EN 40000-1-4: Security Controls – Generic Security Requirements**, a key horizontal standard supporting compliance with the **essential product requirements of the CRA**

Assessment based on the standards proposed at ETSI

- Framework
  - Reference – Mapped requirement ID(s) for full traceability
  - Objective – Security property to be verified
  - Preparation – Environment, configuration, tools, preconditions
  - Activities – Review, test, and observation steps demonstrating threat mitigation
  - Verdict – Defined pass/fail criteria
  - Evidence – Artefacts proving compliance
- Categorization
  - Ensures explicit definition of environment, configuration, tools, and artefacts
  - Creates a common, consistent framework
  - Enables reuse across multiple requirements
  - Reduces duplication and improves maintainability
- Preparation
  - [Assessment Scope] – [Test environment] – [Configuration] – [Preconditions and Initial state] – [Required tools] – [Documentation and References]
- Evidence
  - [Logs and Outputs] – [system configuration] – [product composition evidence] – [risk/threat applicability] – [architecture and implementation]
- Complete conformity assessment for the product functionalities & processes vs core functionality



CRA Expert Group

CRA EG meeting 4 March

- Agenda topics:
  - Commission guidance on the CRA
  - State of the work on voluntary attestations for FOSS and due diligence
  - SBOMs work from ENISA
  - Discussion on CABs and NBs
  - Support for MSMEs
  - SRP
- Questions about the CRA

CRA Authorities works

Latest ENISA developments

- **ENISA CRA SRP**

Under the CRA, ENISA is responsible for establishing and operating the CRA Single Reporting Platform. Friday, ENISA launched a new webpage with frequently asked questions on reporting obligations and the development of the Single Reporting Platform.
Single Reporting Platform (SRP) | ENISA

- **EU ICT Supply Chain Security Toolbox**

]The NIS Cooperation Group composed of EU Member States representatives, the European Commission and ENISA, has adopted an EU ICT Supply Chain Security Toolbox.
This toolbox provides a common approach on how to identify, assess and mitigate cybersecurity risks of ICT supply chains. It also outlines risk scenarios and recommends mitigation measures, including overcoming the dependencies on high-risk suppliers.
Toolbox to improve ICT supply chain security
EU launches new toolbox to strengthen ICT supply chain security

- **NIS investments 2025**

The annual NIS Investments report presents the findings of a study conducted by ENISA to explore how cybersecurity policy translates in practice across organizations in the EU and its effects on their investments, resources, and operations.
NIS Investments 2025

- **Updated International Strategy to empower the EU Cybersecurity Ecosystem**

The revised ENISA International Strategy renews the Agency's approach to engagement with its international partners.
It strengthens the alignment to the EU's international cybersecurity policies, the promotion of EU values, and fortifies our mission to achieve higher common level of cybersecurity across Europe.
Updated International Strategy to empower the EU Cybersecurity Ecosystem

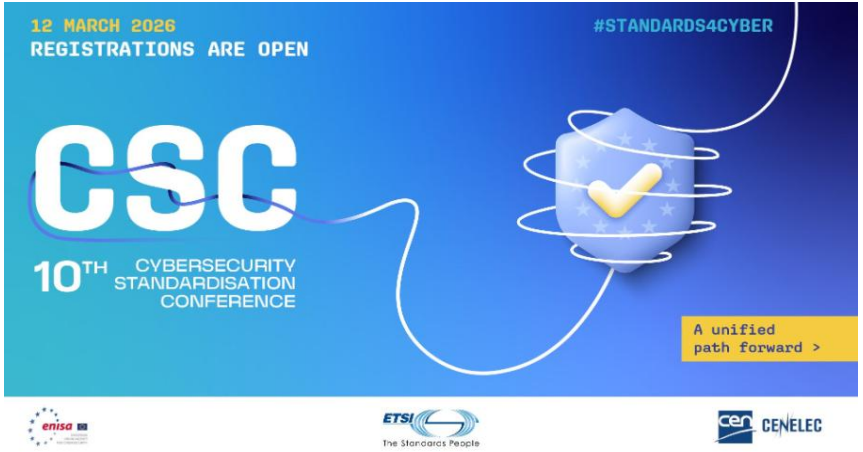
CSC Cybersecurity Standardisation Conference 2026

- 12 March 2026
- Brussels, Marriott Hotel Grand Place / Online
- Registration: http://bit.ly/4qI68Np



TIME	SESSION	TITLE
09:00 – 09:30	Registrations	
09:30 – 09:45	Opening of the conference	
09:45 – 10:45	**Session 1: Challenges and opportunities for the EU standardisation activities** *Where are we in the global standardisation ecosystem and where are we heading?*	• **Panel discussion:** ○ **Jan Ellsberger – ETSI** ○ **Apostolos Malatras – ENISA** ○ **Cinzia Missiroli – CEN and CENELEC** ○ **Raluca Stefanuc – European Commission** • **Presentation:** ***LENS – ENISA cybersecurity standards observatory,*** **Sławomir Górniak,** ENISA
10:45 – 11:15	Coffee break	
11:15 – 12:45	**Session 2: Landscape of legislative proposals and their impact on standardisation** *Cartography of European standardisation, new legal acts and their impact on standardisation*	• **Presentation:** ***Cartography of European standardisation,*** ACN – TBC • **Panel discussion:** ○ **Costas Efthymiou**, Digital Security Authority, Cyprus ○ **Michaela Klopstra,** Accenture. ETSI TC CYBER ○ **Constant Kohler,** Siemens ○ **Annegrit Seyerlein-Klug,** Technische Hochschule Brandenburg ○ **Thomas Stubbings,** Cyber Trust Services
12:45 – 13:45	Lunch break	
13:45 – 15:15	**Session 3: Standards for the Cyber Resilience Act – a gamechanger for European cybersecurity** *Update on the state of affairs, journey towards harmonisation, interplay of CRA with other legislation and its impact on standards*	• **Presentation:** ***CRA harmonized standards assessment – the journey,*** **Camille Dornier,** European Commission • **Panel discussion:** ○ **Roland Atoui, Red Alert Labs** ○ **Sonia Compans, STMicroelectronics** ○ **Camille Dornier, European Commission** ○ **Sandra Feliciano, ETSI TC CYBER EUSR** ○ TBC
15:15 – 15:45	Tea break	
15:45 – 16:45	**Session 4: Way forward for the EU standardisation** *Interactive discussion on the future of standardisation in Europe*	• **Presentation:** ***ENISA work on certification schemes and need for standards,*** **Eric Vetillard,** ENISA • **Panel discussion:** ○ **Martin Chatel,** ETSI ○ **Omar Dhaher,** DIGITALEUROPE ○ **Walter Fumy,** CEN-CENELEC JTC13 ○ **Rob van der Veer,** OWASP ○ TBC
16:45 – 17:00	Summary and closing remarks

OPEN SOURCE SecurityCon EUROPE

Monday, March 23

09:00 CET	Open Source SecurityCon | Welcome + Opening Remarks HALL 11
09:10 CET	From Mild To Wild: How Hot Can Your SLSA Be? - Andrew McNamara, Red Hat & Adolfo Garcia Veytia, Carabiner Systems HALL 11
09:40 CET	Lightning Talk: A Case Study in Cross-Ecosystem Security Response - Lori Lorusso, Rust Foundation HALL 11
10:20 CET	AM Break 2
10:40 CET	Trust, Tampering, and Transparency: What History Can Teach Us About Open Source Security - Lisa Tagliaferri, Chainguard HALL 11
11:15 CET	Upstream Collaboration for the Win (of the CRA)! - Georg Kunz & Jan Melen, Ericsson Software Technology HALL 11
11:50 CET	Panel: It's Not If, It's When - Practical Preparation for the Next Software Supply Chain Attack - Hannah Foxwell & Justin Cormack, Independent; Sal Kimmich, GadflyAI; Erika Heidi, Chainguard; Josh Bressers, Anchore HALL 11
12:25 CET	Lunch Break 2
13:30 CET	Zero Privilege Architecture - 3 Years Onward - Thijs Ebbers & Tadeo Sanchez, ING HALL 11
14:05 CET	Quantum Proofing Sigstore: A Tale of Three Approaches - Kevin Conner & Firas Ghanmi, Red Hat HALL 11
14:40 CET	Tarmageddon: One Bug, Four Forks, and a Disclosure Scavenger Hunt - Marina Moore & Alex Zenla, Edera HALL 11
15:05 CET	PM Break 1
15:20 CET	Secure Your MCP Servers With OAuth, JWT, SPIFFE and More - Lin Sun, Solo.io & Yi Yang, IBM HALL 11
15:55 CET	Simplifying Global Compliance for CNCF Projects With the OpenSSF OSPS Baseline - Madalin Neag, OpenSSF HALL 11
16:30 CET	Signals To Stages: An Effect-Based Maturity Model for Secure Software Delivery - Brandt Keller, Defense Unicorns HALL 11
17:00 CET	Lightning Talk: Your Most Privileged User Isn't Human: The Agent Security Blindspot - Atulpriya Sharma, Improving HALL 11
17:15 CET	Lightning Talk: A Supply Chain Security View of OpenSearch - Ram Iyengar, Linux Foundation HALL 11
17:25 CET	Open Source SecurityCon | Closing Remarks HALL 11

EU Cyber Acts Conference

A European Framework for Global Developers: Building a Bridge to Cyber Compliance

09:00-17:00 SPECIAL FOCUS DAY

The EU Cyber Certification Series Includes:

Presenting Sponsor: **GlobalPlatform**.
Prepare now for the requirements of the EU Cyber Resilience Act (CRA).

Presenting Sponsor: **Jones Day**.
Cybersecurity Policy Developments Shaping the EU and Global Digital Landscape

Public consultations/Have your say

Public consultations

ENISA SME Cyber Resilience Act Survey
A few days ago, ENISA launched a survey for SMEs with the aim to understand the overall level of CRA awareness amongst SMEs, how ready and mature they feel for it, and what kind of support they would find most useful.
The results will provide input to ENISA and the Commission on measures to best support SMEs in their CRA implementation efforts. Please participate in the survey where relevant and / or share it with you contacts!
https://ec.europa.eu/eusurvey/runner/CRASMESurvey

Survey on voluntary attestations for free and open-source software:
The German Federal Office for Information Security (BSI) and the Free Software Foundation Europe (FSFE) have put together a survey to gather input on how voluntary security attestation programmes for open-source software could work under Article 25 of the Cyber Resilience Act. The survey is open until 28 February.
CRA Article 25 — Attestation for Open-Source Software

Another **survey on Voluntary security attestations from ORC WG:**

EU AI Act

	30th April 2025: CEN-CENELEC JTC21 misses the expected delivery date from the standardization request C(2023)3215. Missing this delivery date has no automatic repercussions, the request remains in effect.
	16 May 2025: According to media reports on a JTC21 internal timeline, the majority of the technical standards designed to facilitate compliance with the EU AI Act are now expected to be finalized shortly after the law's legal requirements take effect, i.e. shortly after 2 August 2026. Furthermore, this batch is expected to only partially cover the AI law's legal requirements. Full delivery covering all requested requirements is expected much later.
26 May 2025: MLex reports that the Commission is weighing a move to 'stop the clock' on enforcing some parts of the AI Act because of several developments, including expected delays in JTC21 finishing the standards. Stopping the clock would imply creating new legislation that moves several dates currently in the AI Act backwards. This could include the August 2026 and 2027 dates below.	
June 2025: in an EU ministerial report, Poland proposes to pause enforcement of the AI Act. The Commission formally acknowledges on June 6 that it does not rule out postponing parts of the AI Act in the forthcoming digital omnibus package.	
June 2025: The Commission adopts standardisation request C(2023)3215 with a delivery date on 31 August 2025. It has the same scope of standards, deliverables requested and technical standards as in request C(2025)3871.	
	Ongoing: CEN and CENELEC Joint Technical Committee 21 is drafting the requested standards. Public live tracking of the work programme is available here. As reported in edition 5 of the public newsletter, this 'live' dashboard comes out of the CEN-CENELEC project tracking system, which is updated at irregular intervals. Future dates mentioned on the page may not correspond to the latest (confidential) plans maintained by the JTC21 committee itself.

AOB

Manufacturer Guidelines

Introduction

Conformity assessment procedures
- Standards
- Modules (A, B+C, H)
- EUCC
- Incl. manufacturers of products qualifying as FOSS

Standards
- Mapping them on the obligations and annexes

Guidelines
- (starting from) EC Guidance (art. 26, FAQ)
- Due diligence
- Vulnerability reporting
  - Voluntary reporting
- Vulnerability handling
- SBOMs (and difference from due diligence)
- CVD (incl. the contact details)
- Risk management
- Support period
- Security updates and substantially modified versions
- Technical documentation
- Security by design
- Security by default
- CE marking
- Eu declaration of conformity

Interaction with other stakeholders
- MSAs
- ENISA
- Stewards
- maintainers/developers
- NB
- CAB
- AdCo

Interaction with other legislative acts (Digital Omnibus, CSA, NIS2, DORA, RED DA,

Templates
- Due diligence
- risk management,
- vulnerability & incident reporting
- CVD policy (adaptation of BSI or another?)

Conclusion
References

Due diligence works in OpenSSF?

Stewards

LF CRA Stewards ED/GM One Pager

Create CRA Steward One-Pager outlining obligations

Added a comprehensive one-pager outlining the obligations of Linux Foundation CRA Stewards under the EU Cyber Resilience Act (CRA). This document includes a summary of key responsibilities, a detailed list of actions to take, and references to relevant policies and resources.

Linux Foundation CRA Stewards "One-Pager"

TL/DR

In plain language, here is what the Steward's obligations come down to:

1. Provide a vulnerability reporting process and a cybersecurity policy, to be adopted and publicly shared by each affected project, including details on secure development practices.
2. Have a single point of contact for reporting and inquiring about vulnerabilities and potential incidents - both for the repo code and infrastructure (e.g. https://www.linuxfoundation.org/security)
3. If approached by EU officials (Market Surveillance Authority (MSA), ENISA, National CSIRT, etc.) provide requested information as able. If unsure consult with our security SMEs.
4. If a project's software is known to be actively exploited or if foundation infrastructure has suffered a cybersecurity incident, report to the ENISA Single Reporting Platform (SRP).

LF CRA Playbook

Congratulations! You get to be an open source Steward as outlined within the EU's Cyber Resilience Act (CRA). You are vitally important in supporting upstream projects, developers, and maintainers as they go about the task of maintaining and creating innovative solutions that solve the world's problems. The Steward role was recognized early on by EU policymakers as distinct from the software creators and the commercial organizations that sell products using those technologies.

OpenSSF

OpenSSF Global Cyber Policy Working Group

OSS Stewards Obligations Checklist

This is a checklist of the requirements Open Source Stewards must fulfill to meet the requirements laid out in the CRA

An Open Source Steward is defined in Article 3.14 as:

> *a legal person, other than a manufacturer, that has the purpose or objective of systematically providing support on a sustained basis for the development of specific products with digital elements, qualifying as free and open-source software and intended for commercial activities, and that ensures the viability of those products*

Check	Area	Citation	Requirement	TL/DR
			1. Open-source software stewards shall put in place and document in a verifiable manner a cybersecurity policy to foster the development	

ECCC publishes new call for proposals under Digital Europe Programme

- https://cybersecurity-centre.europa.eu/news/eccc-publishes-new-call-proposals-under-digital-europe-programme-2025-10-22_en
- The call Cyber 09 focuses on critical areas of cybersecurity deployment and covers the following topics:
  - Cybersecure tools, technologies and services relying on AI
  - Uptake of innovative cybersecurity solutions for SMEs
  - Coordinated preparedness testing and other preparedness actions
  - Regional Cable Hubs

Funding for SMEs

- The SECURE project (secure4sme.eu), funded under the Digital Europe Programme, launched a first round of financial support measures to help small businesses achieve compliance with new cybersecurity requirements for their hardware and software products.

- This will allow micro, small and medium enterprises (MSMEs) to request co-funding to strengthen the cybersecurity of their hardware and software products to ensure compliance with the CRA.

- As part of the first round of financial support measures offered by the SECURE project, MSMEs may request co-funding for certain activities with a **maximum of EUR 30.000**. Requests can be submitted from 28 January to 29 March 2026.

1st Call Total Budget	€ 5 million
Funding per grant	Up to € 30,000
Target applicant	Micro, small and medium-sized enterprises (MSMEs)
Co-financing	50%
First call	28 January 2026 - 29 March 2026

SECURE
Cyber Resilience for SMEs

Thank you very much

CRA Standardization request

EUROPEAN
COMMISSION

Brussels, 3.2.2025
C(2025) 618 final

COMMISSION IMPLEMENTING DECISION

of 3.2.2025

on a standardisation request to the European Committee for Standardisation (CEN), the European Committee for Electrotechnical Standardisation (Cenelec) and the European Telecommunications Standards Institute (ETSI) as regards products with digital elements in support of Regulation (EU) 2024/2847 of the European Parliament and of the Council of 23 October 2024 on horizontal cybersecurity requirements for products with digital elements and amending Regulations (EU) No 168/2013 and (EU) 2019/1020 and Directive (EU) 2020/1828 (Cyber Resilience Act)

https://ec.europa.eu/transparency/documents-register/detail?ref=C(2025)618&lang=en

CEN/CENELEC Work Programme

Project Team 1	Project team 2	Project team 3

• **Cybersecurity requirements for products with digital elements – Principles for cyber resilience**
• WI number – JT013089
• CRA requirement Annex I, Part I, 1
• M/606 item 1, 30/08/2026
• Does not (directly) provide a presumption of conformity.
• Addressing the process activities for security risk management during the total product life cycle.
• Activities are described as:
  • Expected inputs
  • Requirement
  • Expected outputs
  • Assessment criteria
• As a horizontal framework standard, it will not mandate any specific methodologies.
	• **Cybersecurity requirements for products with digital elements – Generic security requirements**
	• WI number : JT013091
	• CRA requirement Annex I, Part I, 2
	• M/606 items 2-14, 30/10/2027
	• Does not provide a presumption of conformity.
	• Addressing the essential product requirements.
	• Provides a library of security controls with their objectives and more technical assessment criteria.
	• Provides a mapping of the essential requirements to these security controls.
	• Builds upon the EN 18031:2024 series, augmented with additional security controls.
		• **Cybersecurity requirements for products with digital elements – Vulnerability handling**
		• WI number : JT013090
		• CRA requirement Annex I, Part II
		• M/606 item 15, 30/08/2026
		• The only horizontal standard of the three that hopefully might be suited for citation to provide a partial presumption of conformity.
		• Addressing the process activities for vulnerability handling.
		• Perceived as a horizontal standard that the verticals should be able to normatively reference with no or minimal adoptions.
		• Strong normative dependency on the SOTA standards EN ISO/IEC 30111 and 29147.
