Introduction

CRA Standardization request

EUROPEAN
COMMISSION

Brussels, 3.2.2025
C(2025) 618 final

COMMISSION IMPLEMENTING DECISION

of 3.2.2025

on a standardisation request to the European Committee for Standardisation (CEN), the European Committee for Electrotechnical Standardisation (Cenelec) and the European Telecommunications Standards Institute (ETSI) as regards products with digital elements in support of Regulation (EU) 2024/2847 of the European Parliament and of the Council of 23 October 2024 on horizontal cybersecurity requirements for products with digital elements and amending Regulations (EU) No 168/2013 and (EU) 2019/1020 and Directive (EU) 2020/1828 (Cyber Resilience Act)

https://ec.europa.eu/transparency/documents-register/detail?ref=C(2025)618&lang=en
https://cyberstand.eu/sites/default/files/2025-02/Filipe%20Slides%20CRA_implementation_Feb-2025.pdf

Horizontal standards (1-15)	Vertical standards (16-41)
• Risk-based approach (CRA Annex I) • Essential Requirements (CRA Annex I part 1) • Vulnerability Handling (CRA Annex I part 2)	• Important products class 1 (CRA Annex III) • Important products class 2 (CRA Annex III) • Critical products (CRA Annex IV)

CRA Standardization request

41 topics

3 ‘types’ of deliverables:

Category “A”: horizontal framework	Category “B”: product-agnostic technical measures & vulnerability handling	Category “C”: Important and critical products CRA Standardization Request 9 April 2025 36
• Only CEN and CENELEC • Topic #1 (JTC 13 WG9) • deadline 2026-08-30	• Only CEN and CENELEC • Topic #2-15 (JTC 13 WG9) • Deadline 2027-10-30 (except for line 15 - vulnerability handling - 2026-08-30)	• Topic #16-38: CEN, CENELEC and ETSI • deadline 2026-10-30 • Topic #39-41:CEN and CENELEC • Critical products

A section of the CEN, CENELEC and ETSI WP

Version: V1
Date: 2025-04-02

CEN, CENELEC and ETSI Work Programme
M/604- Cyber Resilience Act

M/606	Technical Committee(s)		M/606 - Planning for standard development						
Topics M606 - Annex I	TC ref.	TC title	In collaboration with	Work Item	Standard reference	Standard title	Last realized stage	Deadline for adoption	Comment
Line 1: European standard(s) on designing, developing and producing products with digital elements in such a way that they ensure an appropriate level of cybersecurity based on the risks									
1	CEN-CLC/JTC 13 WG 9	Cybersecurity and Data Protection	N/A	JT013089	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Cybersecurity requirements for products with digital elements Principles for cyber resilience	10.99 - NWI - New Work Item adopted	2026/08/30	
Lines 2-14 - European standard(s) CRA essential requirements									
2 to 14	CEN-CLC/JTC 13 WG 9	Cybersecurity and Data Protection	N/A	JT013091	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Cybersecurity requirements for products with digital elements – Generic Security Requirements	10.99 - NWI - New Work Item adopted	2027/10/30	
Line 15: European standard(s) on vulnerability handling for products with digital elements									
15	CEN-CLC/JTC 13 WG 9	Cybersecurity and Data Protection	N/A	JT013090	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Cybersecurity requirements for products with digital elements – Vulnerability handling	10.99 - NWI - New Work Item adopted	2026/08/30	
Line 16: European standard(s) on essential cybersecurity requirements for identity management systems and privileged access management software and hardware, including authentication and access control readers, including biometric readers									
16	CEN/TC 224 WG 17	Personal identification and related personal devices with secure element, systems, operations and privacy in a multi sectorial environment	CEN/TC 224 WG 17 (including expertise from WG 18,19 and 20) TC ESI	002242XX	*EN xxxxxx (Will be be defined after the activation of the Work Item)*	Identity management systems and privileged access management software and hardware, including authentication and access control readers, including biometric readers : criteria to fulfill with the essential requirements from regulation 2024/2487 (CRA)	TC decision taken	2026/10/30	
Line 17: European standard(s) on essential cybersecurity requirements for standalone and embedded browsers									
17a	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 617-1*	European standard(s) on essential cybersecurity requirements for embedded browsers	PWI - Proposed Work Item created	2026/10/30	
17b	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 617-2*	European standard(s) on essential cybersecurity requirements for standalone browsers	PWI - Proposed Work Item created	2026/10/30	
Line 18: European standard(s) on essential cybersecurity requirements for password managers									
18	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 618*	European standard(s) on essential cybersecurity requirements for password managers	PWI - Proposed Work Item created	2026/10/30	
Line 19: European standard(s) on essential cybersecurity requirements for software that searches for, removes, or quarantines malicious software									
19	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9	*(Will be be defined after the adoption of the Work Item)*	*EN 304 619*	European standard(s) on essential cybersecurity requirements for software that searches for, removes, or quarantines malicious software	PWI - Proposed Work Item created	2026/10/30	
Line 20: European standard(s) on essential cybersecurity requirements for products with digital elements with the function of virtual private network (VPN)									
20a	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9 CLC/TC 65X WG3 mode 2	*(Will be be defined after the adoption of the Work Item)*	*EN 304 620*	European standard(s) on essential cybersecurity requirements for products with digital elements with the function of virtual private network (VPN)	PWI - Proposed Work Item created	2026/10/30	
20b	CLC/TC 65X WG 3	Industrial-process measurement, control and automation	ETSI TC Cyber EUSR Mode 2	81652	*EN 62443-5-XX (Will be be defined after the activation of the Work Item)*	Security Profile for products with digital elements with the function of virtual private network (VPN)	00.60 - PWI - Preliminary Work Item created	2026/10/30	
Line 21: European standard(s) on essential cybersecurity requirements for network management systems									
21a	ETSI CYBER-EUSR	ETSI TC Cyber Working Group for EUSR	CEN-CLC/JTC 13 WG 9 CLC/TC 65X WG3 mode 2	*(Will be be defined after the adoption of the Work Item)*	*EN 304 621*	European standard(s) on essential cybersecurity requirements for network management systems	PWI - Proposed Work Item created	2026/10/30	
21b	CLC/TC 65X WG 3	Industrial-process measurement, control and automation	ETSI TC Cyber EUSR Mode 2	81650	*EN 62443-5-XX (Will be be defined after the activation of the Work Item)*	Security Profile for network management systems (based on IEC 62443)	00.60 - PWI - Preliminary Work Item created	2026/10/30

Standards developed under CEN/CENELEC

CEN/CENELEC Work Programme

Project Team 1	Project team 2	Project team 3

• **Cybersecurity requirements for products with digital elements – Principles for cyber resilience**
• WI number – JT013089
• CRA requirement Annex I, Part I, 1
• M/606 item 1, 30/08/2026
• Does not (directly) provide a presumption of conformity.
• Addressing the process activities for security risk management during the total product life cycle.
• Activities are described as:
  • Expected inputs
  • Requirement
  • Expected outputs
  • Assessment criteria
• As a horizontal framework standard, it will not mandate any specific methodologies.
	• **Cybersecurity requirements for products with digital elements – Generic security requirements**
	• WI number : JT013091
	• CRA requirement Annex I, Part I, 2
	• M/606 items 2-14, 30/10/2027
	• Does not provide a presumption of conformity.
	• Addressing the essential product requirements.
	• Provides a library of security controls with their objectives and more technical assessment criteria.
	• Provides a mapping of the essential requirements to these security controls.
	• Builds upon the EN 18031:2024 series, augmented with additional security controls.
		• **Cybersecurity requirements for products with digital elements – Vulnerability handling**
		• WI number : JT013090
		• CRA requirement Annex I, Part II
		• M/606 item 15, 30/08/2026
		• The only horizontal standard of the three that hopefully might be suited for citation to provide a partial presumption of conformity.
		• Addressing the process activities for vulnerability handling.
		• Perceived as a horizontal standard that the verticals should be able to normatively reference with no or minimal adoptions.
		• Strong normative dependency on the SOTA standards EN ISO/IEC 30111 and 29147.

CEN/CENELEC JTC 13 WG9 Work Programme

Project 1

High level process **activities** to address the Total Product Life Cycle, defining:

- Goal that needs to be achieved
- Mandatory and optional inputs
- Minimum expected outcomes

Process activities such as security monitoring, risk assessment, verification, validation and release

Project 3

More detailed process **activities** (with assessment criteria fit for a presumption of conformity) to address the vulnerability management requirements

During risk assessment the appropriate security controls and their appropriate level can be selected to ensure risks are mitigated to an acceptable level

Risk assessment

Product requirements

Project 2

A mapping of the essential product requirements to a list of appropriate **security controls** at various levels

(controls have their own scale/levels to achieve the goal of the security control)

During the elicit requirements activity the deliverables from project 2 can be used to determine and select the appropriate security controls that should be implemented into the product to fulfil on a risk-based manor the essential requirements

CEN/CENELEC high-level expected timeline

Updated plan:

- Vocabulary: Submit to CCMC for ENQ September 30
- PT1: Submit to CCMC for ENQ – Aligned with Vocabulary - September 30
- PT2: Submit for draft – 15 December ➔ Delayed to January
- PT3: Submit to CCMC for ENQ - October 20 + CCMC will publish to ENQ within a week

They want to advance the **Public Enquiry** for PT1 and PT3 in **early November**
All the ETSI vertical standards are dependent on these

PT1 - JT013089

- Updated every day (answer to the comments)
- Structure
  - Cybersecurity Principles
    - Risk-Based approach for cybersecurity
    - Security by Design
    - Secure by Default
    - Transparency
    - All these chapters are having two subchapters – Principle and Guidance
  - Product cybersecurity risk management elements
    - Product Context (product's use, product's functions, Product's operational environment, Product's system overview, Product's support period)
    - Applicability analysis
    - Product's cybersecurity risks acceptance criteria
    - Consultation on product's cybersecurity risks
    - Assessment of product cybersecurity risk (identification of product assets, identification of product cybersecurity threats, Determination of product's cybersecurity risks, Evaluation of product cybersecurity risks)
    - Treatment of product's cybersecurity risks
    - Communication of product's cybersecurity risks
    - Review of product's cybersecurity risks
  - Product cybersecurity activities
    - Product cybersecurity plan
    - Cybersecurity risk management activities
    - Cybersecurity requirements
    - Secure Product Architecture and Design
    - Secure implementation
    - Security verification and validation
    - Secure production
    - Cybersecurity issue management
    - Product monitoring
    - Decommissioning
    - Third-Party Component Cybersecurity Management (incl. Due Diligence part)

PT2 - JT013091

- On hold -> All the meetings are cancelled until 20 October
  - Focus on PT3
- Rely on EN 18031, IEC62443 and NIST SP800-53
  - Gap analysis
  - Mapping on PT2 requirements
- Structure – Requirements catalogue
  - Vulnerability management
  - Security by default
  - Secure SW-update
  - Secure storage
  - Secure communication mechanism
  - Logging mechanism
  - Authentication mechanism
  - Access control
  - User notification mechanism
  - Confidentiality
  - Integrity
  - Data minimization
  - Recovery from incidents
  - External impact limitation
  - Attack surface reduction
  - Reduction of the impact of an incident
  - Recording and monitoring of security activities
  - Deletion mechanism

  + Recommendations for additional requirements

PT3 - JT013090

- The commission is still considering the full presumption of conformity on the scope of the PT3 if we address the comments of the Harmonized Standards consultant. The partial presumption is still an option.

PT3

- Based on
  - EN ISO/IEC 29147:2020 Information technology - Security techniques - Vulnerability disclosure (ISO/IEC 29147:2018)
  - EN ISO/IEC 30111:2020 Information technology - Security techniques - Vulnerability handling processes (ISO/IEC 30111:2019)
  - JT013089:2026 Cybersecurity requirements for products with digital elements – Principles for cyber resilience
  - Multiple phases
    - Gap Analysis
    - Mapping on PT3 (and on others as well, if relevant)
    - Adopt (as it is or enhanced)
    - There is also the possibility to trigger updates on ISO/IEC standards

PT3

- Structure = Vulnerability Handling Requirements
  - **Preparation** (Policy on coordinated vulnerability disclosure, Capability to receive reports, Contact Information, Secure communication, Product identification, Software components, Hardware components, SBOM)
  - **Receipt** = the discovery phase of the vulnerabilities handling process (Monitoring, Potentially impacted software components, Potentially impacted hardware components)
  - **Verification** = the task to verify an information about a possible vulnerability related to its completeness and technical merit (report verification, triage, Vulnerability Risk Assessment, On-going communication, Coordinator involvement, Operational security)
  - **Remediation** (Remediation Decision, Remediation Development, Remediation Test)
  - **Release** (Provisioning of Security Updates, Distribution of security updates, Release Information
  - **Post release** (Post release plan)

Further information

- JTC 13 WG6 works are delayed
- CLC/TC65X WG3
  - Challenges
    - Sync between the vertical standards
    - Reference to PT3
      - Possibility to include a general update in all of the CEN/CENELEC vertical standards prior to the important ‘review milestones’

- They will have the vocabulary ready by end of this month
  - It will contain the key notions specific to CRA but which are not defined in the CRA, nor in the Blue Guide.
  - But they will try to re-use the definitions from other standards (IEEE, ISO, IEC, etc.)
  - Some of the things defined are:
    - Total product life cycle
    - Tolerable risk
    - Risk mitigation
    - Sensitive information
    - Asset
    - Product
    - activity

Further information

- The intend is not to address the open-source software steward responsibilities in the CEN/CENELEC standards
- Initially WG9 had intention to create an informative annex
- But those obligations are not part of Annex I (all other horizontal standards are related to Annex I – see slide 7)
- They may create a separate TR for this purpose, if desired

Webinars/workshops/trainings

- Their most recent webinar is available: From EN IEC 62443 to CRA: OT Cybersecurity for Important products Class I & II’
  - It took place on 9 September.
    Webinar 'CRA Standards Unlocked: From EN IEC 62443 to CRA: OT Cybersecurity for Important products Class I & II' - CEN-CENELEC

- Workshop: Cyber Resilience Act and Horizontal Standards

Tue, Sep 23 | 9:30 AM – 5:00 PM | Madrid

Registration link: https://www.stan4cra.eu/event-details/workshop-cyber-resilience-act-and-horizontal-standards

Standards developed under ETSI

Key information

- https://portal.etsi.org/home.aspx
- All the works are under the control of TC CYBER WG EUSR https://portal.etsi.org/tb.aspx?tbid=919&SubTB=919#/
- The work programme and the meeting schedule can be found navigating on that page
  - Very intense meeting schedule
  - They have monthly joint meetings with CEN and CENELEC
- Their Forge https://forge.etsi.org/rep/cyber/stan4cr2
  - Only 10 standards (among 18) are developed using markdown
  - The links are also displayed on the WI page
- Complementary information resource: https://www.stan4cra.eu/
  - Funding opportunities: https://cyberstand.eu/8th-specific-service-procedure

ETSI Public Consultation

- **Target for starting their public consultation at the end of September**
- Previewed by a webinar on 29 September

ETSI Webinar Invitation: Cyber Resilience Act (CRA) Standards Unlocked – Opening Public Consultation
📅 Date: 29 September 2025
🕑 Time: 14:00 CEST (duration 75 mins)

Join ETSI's webinar on the Cyber Resilience Act (CRA) and its implementation through the standardisation process. The session will explain how harmonised standards are being developed to support compliance for important product categories, outline the role of stakeholders, and provide an update on current progress.

Speakers:

•Alex Leadbeater, ETSI TC CYBER Chair
•Federica Bozzi, STF 701 Project Leader

What to expect during the webinar?

• Understand the CRA: Get a structured overview of the Cyber Resilience Act and its practical implications.
•Learn about the role of standards: See how harmonised standards will support compliance and reduce regulatory uncertainty.
•Stay up to date: Hear the latest developments in the standardisation process and where things currently stand

Register now to join the live event!

- Title: Essential cybersecurity requirements for **smart home general purpose virtual assistants**
- CRA Smart home assistants Topic # 31 full
- Draft version 0.0.1
- Structure
  - Product context
    - General
    - Intended purpose and reasonably foreseeable use
    - Essential functionalities
    - Architecture
    - Operational Environment
    - Users
  - Requirements specifications
    - Product's environmental profile
    - Product's technical requirements specifications
      - Known exploitable vulnerabilities
      - Default configuration
      - Authentication and access control mechanisms
      - Integrity protection
      - Confidentiality protection
      - Data minimization
      - Availability protection
      - Impact minimization
      - Limit attack surface
      - Logging and monitoring mechanisms
      - Deletion mechanisms
      - Other product's technical requirements specifications
    - Activities' environmental profile
    - Activities' requirements specifications related to the product

ETSI Work Programme
DEN/CYBER-EUS-012

Timeline	
Work item adoption	1 May 2025
Early draft	10 August 2025
Final draft	30 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **operating systems**
- CRA operating systems Topic # 26 Part 1/N
- Draft version 0.0.3
- Updates
  - The meetings are oriented towards the existing contributions done in Forge
  - Handling: PC OS, mobile phone OS, server OS, RTOS, embedded OS, etc.
    - Elements included: kernel, device drivers, libraries, authentication services, logging and monitoring, configuration of security-related things, etc.
    - Not included: hypervisors, containers, boot loaders, hardware, etc.
  - Chapters
    - Products overview and architecture (incl. OS security functions, HL OS architectures, access and control mechanisms, scheduling and resource mgmt.)
    - Use-cases to assist manufacturers in choosing the security levels and risk factors
    - Risk factors and tolerance
    - Requirements specifications
    - Security profiles

ETSI Work Programme
DEN/CYBER-EUS-013

Timeline	
Work item adoption	1 May 2025
Early draft	29 July 2025
Final draft	30 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **routers, modems intended for the connection to the internet, and switches**
- CRA routers, modems, and switches Topic # 27 Part 1/2
- **Stable** Draft version 0.0.5
- Presented as **90% complete**
- Updates
  - Already a 59-pages document
  - Description of the products and the context
  - A capability model based on the products' way of working
  - Cybersecurity requirements (secure by design – referencing PT1 from CEN/CENELEC, no known vulnerabilities, secure by default configuration, security updates, etc.)
  - Vulnerability handling (based on CEN/CENELEC PT3)

ETSI Work Programme
DEN/CYBER-EUS-014

Timeline	
Work item adoption	1 May 2025
Early draft	9 July 2025
Final draft	31 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **smart home products with security functionalities**; including smart door locks, security cameras, baby monitoring systems and alarm systems
- CRA Smart home security products Topic # 32 full
- Draft version 0.0.1
- Structure
  - The same format as EUS-011

ETSI Work Programme
DEN/CYBER-EUS-015

Timeline	
Work item adoption	7 July 2025
Early draft	12 July 2025
Final draft	30 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **Public key infrastructure** and **digital certificate issuance** software
- CRA PKI and digital certificate issuance software - Topic #24
- Draft version 0.0.1
- Structure
  - Definition of terms, symbols and abbreviations
  - Product contexts
    - PKI products
    - Out of scope use/environments
    - Product overview and architecture
  - Security Profiles
    - Private PKI for SME
    - Large enterprise and public PKI
    - C-ITS PKI

ETSI Work Programme
DEN/CYBER-EUS-016

Timeline	
Work item adoption	26 May 2025
Early draft	18 June 2025
Final draft	31 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **hypervisors and container runtime systems** that support virtualised execution of operating systems and similar environments
- Essential cybersec reqts for hypervisors and container runtime systems Topic #35
- Draft version 0.0.3
- Presented **as 75% complete**
- Structure
  - Definition of terms, symbols and abbreviations
  - Compliant Products
  - Representative Use Cases
  - Security Category Levels and Requirement Selection
  - Security Problem Definition
  - Operational Environment Objectives
  - Generic Security Requirements
  - Instantiated VES Security Requirements
  - Instantiated Container Security Requirements
  - Assurance Security Requirements
  - Conformance Assessment of Requirements

ETSI Work Programme
DEN/CYBER-EUS-017

Timeline	
Work item adoption	30 June 2025
Early draft	12 August 2025
Final draft	31 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **physical and virtual network interfaces**
- Essential cybersec reqts for physical and virtual network interfaces Topic 25 Part a
- Draft version 0.0.2
- Structure
  - Product context (what is in, what not)
  - Product overview and architecture
  - Use cases
  - Risk factors
  - Security levels
  - Operational environment
  - Distribution of security functions
  - Requirements specifications

ETSI Work Programme
DEN/CYBER-EUS-018

Timeline	
Work item adoption	30 June 2025
Early draft	18 July 2025
Final draft	30 December 2025
Publication	11 November 2026

- Title: Essential cybersecurity requirements for **software that searches for, removes, or quarantines malicious software**
- CRA antivirus software Topic # 19 full
- Draft version 0.0.4
- Structure
  - Product context
    - Essential functionalities
    - Security Category Levels
    - Identified Threats
    - Intended purpose and reasonably foreseeable use
    - Architecture
    - Operational Environment
    - Users
    - Potential “Chain of Supply” Interactions with other PwDE
  - Requirements specifications
    - Product’s environmental profile
    - Product’s technical requirements specifications
    - Activities’ environmental profile
    - Activities’ requirements specifications related to the product

ETSI Work Programme
DEN/CYBER-EUS-019

Timeline	
Work item adoption	20 August 2025
Early draft	30 September 2025
Final draft	1 May 2026
Publication	10 February 2027

- Title: Cybersecurity Requirements for **Network Functions of Telecommunications Systems**
- No draft available
- Work item was just adopted

ETSI Work Programme
DEN/CYBER-EUS-020

Timeline	
Work item adoption	22 August 2025
Early draft	24 August 2025
Final draft	22 May 2026
Publication	17 March 2027

- Title: Essential cybersecurity requirements for **firewalls**, **intrusion detection and/or prevention systems**
- Draft version 0.0.2
- Work item was just adopted
- Structure
  - Product context
    - Firewalls
    - Intrusion detection systems
    - Intrusion prevention systems
    - Product architecture and components
    - Use cases and deployment scenarios
    - Product essential functions
    - Operational environment
    - User categories and access context
    - Product security context summary
  - Applicability model
  - Threat landscape and security considerations
  - Risk assessment framework
  - Cybersecurity requirements
  - Vulnerability Handling Requirements

Other general details

- WG EUSR is electing its vice-chairs
- Almost all the drafts are in an early draft
- They progress well
- They are dependent on the vocabulary works at CEN/CENELEC
  - Avoid discrepancies between the vocabulary and their definitions
- They have an intention to include mappings between the standards and CRA

AOB

Thank you very much
